OUTLOOK AND STRATEGY

Market Review. The Philippine Stock Exchange Index (PSEi) finally broke from a two-month decline after posting a 1.9% climb for the month of April. The rally was supported by decelerated inflation prints and a strong start of the 1st quarter earnings results. Local Philippines inflation in March registered at 7.6% or slower than 8.6% mark in February. Meanwhile, the US Consumer Price Index dropped to 5% in March, lower than 5.1% consensus estimate and 6% figure in February. Adding to the positive sentiment is the strong start of the 1Q 2023 earnings reports with banking names at the forefront as BDO and BPI posted better-than-expected results. The PSEi closed at 6,625.08 in April.

In terms of activity, the PSEi was less active in April with the Average Daily Turnover coming in only at US\$87.5 million or 33.2% lower compared from the prior month. This can be attributed to the number of non-working Holidays for the month which kept market players on the sidelines. Meanwhile, in terms of foreign flows, foreigners turned "Net Buyers", at US\$34.3 million worth of inflows. However, on a year-to-date (YTD) basis, net foreign outflows are still hefty at US\$484 million.

For the individual stock performances, the top three index gainers for the month are as follows: MPI (+20.38%), AEV (+13.12%) and BDO (+12.06%). Meanwhile, the bottom three index performers include: SCC (-16.54%), TEL (-15.21%) and DMC (-14.70%).

Fund Performance. The fund returned 2.36% in April, outperforming its benchmark by 43 basis points. Year-to-date, it outperformed the benchmark by 82 basis points with a return of 1.71%.

Fund Strategy. The Fund will continue to be defensive as volatility is expected to persist across financial markets. Stubbornly high global inflation is keeping interest rates elevated. However, we will take advantage of the volatility in buying quality names on dips and sell on excessive market rallies.
