KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk:	The fund invests in short term domestic fixed income securities, exposing investors to the risk of loss arising from a rise in interest rates, which generally causes fixed income security prices to decline. Factors/events that may lead to a rise in interest rates include adverse market conditions, issuer-specific factors/events and/or negative developments in domestic political and economic conditions.
Liquidity Risk:	Investors are exposed to the risk of loss due to the Fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/sellers in the market, low trading volumes or market disruptions, among other reasons/factors.
Credit/Default Risk:	Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.
Related Party Risk:	Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt securities issued by related parties, as well as the execution of trade transactions with related counterparties.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

OUTLOOK AND STRATEGY

Market Review. The BPI Money Market Index returned 0.22% in February, despite benchmark short-term government yields rising by 26 basis points (bps) on average. Average daily trading volume fell to PHP11.91 billion from January's PHP17.55 billion with trades mostly seen on the long-end of the curve.

The Bureau of the Treasury (BTr) held four Treasury Bill auctions in February. The last auction for the month saw the 364-day paper fully awarded at an average rate of 5.455%, while the 91- and 182-day papers partially awarded at average rates of 4.413% and 5.060%, respectively. Over the course of February, a total of Php571.12bn worth of BSP Bills were issued at a weighted average yield of 6.441%. Towards the end of the month, the BTr released its February auction schedule with five Treasury Bill auctions and five FXTN issuances (6-, 10-, 13-, 20-, and 7-year tenors).

In the local space, January inflation exceeded expectations printing 8.7% year-on-year, the highest since November 2008. The inflation uptrend was mainly driven by housing, electricity, water, fuel, and food-related expenses. Consequently, the Bangko Sentral ng Pilipinas (BSP) hiked its policy rate by 50 basis points to 6.00% during the first Monetary Board meeting of the year, to curb demand and limit inflation. The central bank raised its 2023 inflation forecast to 6.1% but maintained its 2024 forecast at 3.1%.

Fund Performance. The Fund returned 0.29% during the month, outperforming the benchmark by 2 bps.

Fund Strategy. The Fund favors the safety of shorter dated securities and Time Deposits. Expectations of rising rates moving forward may provide an opportunity for better yielding investment outlets
