KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk: The fund invests in short term domestic fixed income securities, exposing investors to the risk of loss arising from a rise in interest rates, which generally causes fixed income security prices to decline. Factors/events that may lead to a rise in interest rates include adverse market conditions, issuer-specific factors/events and/or negative developments in domestic political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the Fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Credit/Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt securities issued by related parties, as well as the execution of trade transactions with related counterparties.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

OUTLOOK AND STRATEGY

Market Review. The BPI Money Market Index returned 0.10% in June, as benchmark short-term government yields rose by 28 basis points (bps) on average. Average daily trading volume fell significantly to PHP8.55 billion from May's PHP21.77 billion with trades mostly seen at the long end of the curve.

The Bureau of the Treasury (BTr) held four Treasury Bill auctions in June. The last auction for the month saw the 91-day paper fully awarded at an average rate of 6.086% while the 182-, and 364-day papers were partially awarded at average rates of 6.144%, and 6.219%, respectively. The BTr started offering 56-day BSP Bills this month. Over the course of June, a total of Php581 billion worth of 28- and 56-day BSP Bills were issued at weighted average yields of 6.655% and 6.644%, respectively. Towards the end of the month, the BTr released the July auction schedule with four Treasury Bill auctions and four FXTN issuances (9-, 15-, 6-, and 7-year tenors) while increasing the offer size to PHP30 billion each.

In the local space, May headline inflation slowed down further to 6.1 % year-on-year, from last month's 6.6% year-on-year. The dwindling inflation figure was primarily driven by a decrease in transport prices and slower food inflation. During its scheduled policy meeting, the Bangko Sentral ng Pilipinas (BSP) paused its tightening cycle and kept its policy rate unchanged at 6.25% as headline inflation continued in a downward trend. Moreover, the central bank adjusted its inflation forecast lower for 2023 to 5.4% but higher for 2024 to 2.9%.

Fund Performance. The Fund returned 0.36% during the month, 2 bps behind the benchmark.

Fund Strategy. The Fund favors the safety of shorter dated securities and Time Deposits. Expectations of rising rates moving forward may provide an opportunity for better yielding investment outlets
