Interest Rate Risk:	The fund invests in short term domestic fixed income securities, exposing investors to the risk of loss arising from a rise in interest rates, which generally causes fixed income security prices to decline. Factors/events that may lead to a rise in interest rates include adverse market conditions, issuer-specific factors/events and/or negative developments in domestic political and economic conditions.
Liquidity Risk:	Investors are exposed to the risk of loss due to the Fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.
Credit/Default Risk:	Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.
Related Party Risk:	Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt securities issued by related parties, as well as the execution of trade transactions with related counterparties.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

OUTLOOK AND STRATEGY

Market Review. The BPI Money Market Index returned 0.41% in September, while benchmark short-term government yields saw no movement for the month. Average daily trading volume for the month amounted to PHP18.22 billion higher than August's PHP16.82 billion with trades mostly seen on the short-end of the curve.

The Bureau of the Treasury (BTr) held four Treasury Bill auctions in September. During its last T-Bill auction for the month, the three tenors were fully awarded with the average yield of the 364-day paper falling to 6.119% while the 91-, and 182-day papers rose to 5.595%, and 5.968%, respectively. The BSP increased its weekly offering of BSP Bills to PHP40 billion for the 56-day paper and PHP120 billion for the 28-day paper by the end of the month. Over the course of September, a total of Php747 billion worth of 28- and 56-day BSP Bills were issued at weighted average yields of 6.719% and 6.724%, respectively. Towards the end of the month, the BTr released the October auction schedule with four Treasury Bill auctions and only three FXTN issuances (5-, 7-, and 10-year tenors) with an offer size of PHP30 billion each.

In the local space, August headline inflation surged to 5.3% year-on-year, from last month's 4.7%. The food and transport costs were the main drivers of resurgence in inflation reversing the six straight months of deceleration. The Bangko Sentral ng Pilipinas (BSP) kept its policy rate at 6.25% during their September Monetary Board meeting. BSP Governor Eli Remolona mentioned that a possibility of rate hike is still on the table and the magnitude will depend on the inflation data and other crucial economic data. The BSP revised its inflation forecast upward, settling at 5.8% (from 5.6%) for 2023 and 3.5% (from 3.3%) for 2024 due to higher-than-expected inflation, increases in global and oil prices, and recent depreciation of Peso.

Fund Performance. The Fund returned 0.39% during the month, 4 basis points ahead the benchmark.

Fund Strategy. The Fund favors the safety of shorter dated securities and Time Deposits. Expectations of rising rates moving forward may provide an opportunity for better yielding investment outlets
