KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk: The fund invests in a portfolio of Philippine Sovereign and corporate securities comprising the JP Morgan Asia Credit Philippines Total Return Index, exposing investors to the risk of loss arising from a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic and global political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, the execution of trade transactions with related counterparties.

Credit/Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic and global political and economic conditions.

Index Tracking Risk: Investors are exposed to the risk of not being able to achieve a level of return that matches the index being tracked by the fund due primarily to operating and fund management expenses.

OUTLOOK AND STRATEGY

Market Review. The JP Morgan Asia Credit Index (JACI) Philippines returned 1.59% in March as Philippine dollar-denominated bonds tracked movements in US Treasuries.

Global bonds rallied in March as investors adopted a flight-to-safety stance amid concerns over the health of the banking sector. The US Federal Reserve responded swiftly to the closure of Silicon Valley Bank, ensuring depositors that all their deposits would be protected. Central banks across the globe likewise reiterated their commitment to provide liquidity and stabilize markets as needed. During its March Federal Open Market Committee (FOMC) meeting, the Fed opted to hike rates by another 25 basis points, citing the continued need to cool inflation even as the new challenge of maintaining financial stability emerged. Both US CPI and employment data released during the month continued to support the case for further policy tightening. For the month, the 10-year US Treasury yield fell by 45 basis points to close at 3.47%.

In the local economic space, inflation for the month of February settled at 8.6% year-on-year, marginally lower than the 8.7% in January. Though the figure was lower than market expectations, prices of food and fuel continued to be affected by supply-side pressures. Consequently, the Bangko Sentral ng Pilipinas (BSP) decided to raise benchmark rates by 25 basis points during their Monetary Policy meeting held March 23. BSP officials reiterated that they remained prepared to adjust policy settings as needed, given persistently high CPI levels, as well as central bank tightening measures globally.

Fund Performance. The fund returned 1.06% in March, underperforming its benchmark by 53 bps. Year to date, the fund returned 1.95%, below the benchmark by 93 bps

Fund Strategy. The Fund will continue to closely track the JPMorgan Asia Credit Total Return Index. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
