## OUTLOOK AND STRATEGY

**Market Review.** The JP Morgan Asia Credit Index (JACI) Philippines rose by 5.27% in November as Philippine dollar-denominated bonds tracked movements in US Treasuries.

Global bonds rallied for the month as dovish US Federal Reserve commentary, weaker-than-expected US employment data and easing oil prices sparked hopes that the rate tightening cycle was nearing its end at last. In its FOMC meeting concluded early November, the US Federal Reserve opted to keep policy rates steady for a second straight session. The Committee upgraded its general assessment of economic growth, while continuing to highlight that they would remain watchful of upside inflation risks. Meanwhile, US CPI for the month of October was up 3.2% YoY, slower than the prior month's 4.1% and consensus estimate of 3.3%. Consequently, the 10-year US Treasury benchmark yield fell to as low as 4.26% before ending 24 basis points lower month-on-month at 4.33%.

In the local space, inflation for the month of October fell to 4.9% year-on-year from the 6.1% print in September. The figure was well below market expectations (consensus estimate: +5.6% YoY) and the central bank's projected range of 5.1% to 5.9%. The decline was brought about by declining food and fuel prices. The country's 3rd quarter GDP grew by 5.9% YoY, faster than consensus estimate of 4.7% and the 2Q2023 figure of 4.3%. Expansion was driven by a recovery in government spending, as well as resilient consumer spending. With easing inflation and stable growth, the BSP announced that it would hold policy rates steady during its Monetary Policy Board meeting held on November 16. BSP Governor Eli Remolona nonetheless noted that the central bank would remain vigilant of its inflation target and would be ready to adjust policy rates as necessary.

**Fund Performance.** The fund returned 5.04% in November, underperforming its benchmark by 23 bps. Year to date, the fund returned 3.30%, below the benchmark by 148 bps.

**Fund Strategy.** The Fund will continue to closely track the JPMorgan Asia Credit Total Return Index. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
