## OUTLOOK AND STRATEGY

**Market Review.** The local equities market recovered anew in November after a weak October showing where the index fell below the 6,000-mark. The rally emanated from growing expectations that interest rates may have already peaked following a seemingly improved economic environment. Reports on higher-than-expected 3rd quarter GDP at 5.9%, cooling inflation from both local and the US, Philippine peso strength and central banks' (US Fed and BSP) decision to hold key policy rates propelled sentiment. Moreover, investors digested reports on 3rd quarter earnings results from Philippine companies which showed positive results, albeit at a slower pace which reflects the impact of higher inflation. The Philippine Stock Exchange Index (PSEi) rose 4.18% to 6,223.73 in November.

Trading activity continued to be uninspiring with the average daily turnover slowing down further by -12.3% to US\$71 million for the month. In terms of foreign flows, foreigners finally turned "net buyers", after consecutive months of selling, and were also 53% of active participants. Net foreign inflow was recorded at US\$18 million for November.

In terms of stock performance, the top three gainers for the month include: ALI (+12.03%), JFC (+10.54%) and AC (+9.66%). Meanwhile, the bottom three performers were: ACEN (-9.43%), AGI (-7.55%) and NIKL (-7.34%).

**Fund Performance.** The Fund returned 3.34% in November, below its benchmark by 84 bps. Moreover, the YTD performance of the Fund of -0.73% is above its benchmark by 449 bps.

**Fund Strategy.** The Fund will remain defensive amidst the volatility and thin liquidity in the stock market. Elevated interest rates, sticky global inflation, and resilient US dollar will likely continue capping risk assets. The fund will be nimble in maximizing market swings to rebalance in favor of high-quality names.
