OUTLOOK AND STRATEGY

Market Review. The Philippine Stock Exchange Index (PSEi) retreated in May and this could be attributed to the following concerns: 1) Worries over potentially more rate hikes from US Federal Reserve 2) US Debt Ceiling deadlock, and 3) Uncertainties on Bangko Sentral ng Pilipinas' (BSP) monetary policy stance. The weakness of the Philippine Peso against the greenback (US Dollar) after falling to a six-month low at Php56.31 and the MSCI rebalancing – where the Philippines had a general down-weight causing significant net foreign outflow, further added downward pressure to share prices. The local bourse index dropped 2.2% to below 6,500-mark at 6,477. Infrastructure index also got dragged along with market-wide weakness. Global port operator ICT dropped on disappointing 1Q2023 earnings and amidst cautious management guidance.

Bottom three Infrastructure Index Constituents include:

- ICT (-10.14%),
- MWC (-6.14%)
- DMC (-3.57%)

Fund Performance. The fund returned -3.76% in the month, underperforming the Philippine Infrastructure Index by 12 bps. Year to date, the fund returned -0.45%, behind the benchmark by 53 bps.

Fund Strategy. The fund will continue to track the Philippine Infrastructure Index.
