OUTLOOK AND STRATEGY

Market Review. The Philippine Stock Exchange Index (PSEi) finished below the 6,500 level again on muted volumes as worries over the elevated interest rate environment persisted. The US Federal Reserve (The Fed) kept benchmark rates steady in the latest FOMC meeting but still gave a hawkish stance by hinting of potentially two more rate hikes this year. Meanwhile on the local front, the Bangko Sentral ng Pilipinas (BSP) also maintained interest rates with retiring BSP Governor Medalla stating that the central bank will only cut rates should inflation fall within the BSP target band of 2% to 4%. The PSEi dropped 0.14% to 6,468.17 in June.

We saw lackluster trading for the month of June with Average Daily Turnover only at Php4.27 billion or 15% lower month-on-month. Meanwhile, foreigners turned “Net Buyers” at US\$97 million, mostly flowing through banks, particularly BPI and BDO. However, foreign participation fell to 38% compared to 53% in the previous period.

As for individual stock performances, the top three index gainers for the month were: MPI (+9.66%), PLDT (+9.33%) and BPI (+8.85%). Meanwhile, the bottom three index performers included: WLCON (-14.96%), ACEN (-8.02%) and ALI (-7.60%)

Fund Performance. The fund returned 3.43% in the month, behind the Philippine Infrastructure Index by 4 bps. Year to date, the fund returned 2.97%, behind the benchmark by 57 bps.

Fund Strategy. The fund will continue to track the Philippine Infrastructure Index.
