## OUTLOOK AND STRATEGY

**Market Review.** Global equity markets rose in July. Market sentiment continued to improve on the back of resilient economic data and declining trend of inflation. The Federal Reserve and European Central Bank maintained their hawkish stance and hiked their interest rates by 25 basis points. Expectation for a soft landing in the US has garnered steam as inflation figures seemingly peaked, while the economy continues to be robust. US inflation eased more than market forecasts at an annual rate of 3% in June from 4.0% in May. In terms of growth, the US grew by 2.4% in the second quarter, above consensus estimates of 2.0%. Across regional markets, China has outperformed the broader global and emerging market equity indices as its government announced positive measures to boost its economy, including providing stimulus to improve consumption and support to its real estate sector.

**Fund Performance.** The fund returned 2.08%, underperforming the benchmark by 147 basis points. Allocation in US equities and stock selection detracted from performance.

**Fund Strategy.** In 2023, we expect major structural trends such as the increasing market share of electric vehicles sold, increased recycled content in clothing and packaging, and record installations of wind turbines and solar panels to continue. The ongoing Russia-Ukraine war has resulted in the world, particularly Europe, determined to reduce their reliance on traditional sources of energy such as oil and gas, requiring large investments in renewable energy in the coming years. In addition, we continue to see support for climate solutions and green technologies through government policies such as the Inflation Reduction Act signed by US President Joe Biden. We believe that strong ESG companies are likely to generate positive financial performance over time as investing in sustainability can deliver higher growth and returns through innovation, higher operational efficiency and better risk management.
