OUTLOOK AND STRATEGY

Market Review. The JP Morgan Asia Credit Index (JACI) Philippines lost 1.30% in October as Philippine dollar-denominated bonds tracked movements in US Treasuries.

Global bonds experienced heightened volatility in October as rising tensions between the Hamas and Israel sparked inflationary concerns amid rising oil prices. Stronger-than-expected US retail sales, healthy 3Q2023 GDP growth data and a persistently elevated CPI print further underscored the Fed's "higher for longer" rhetoric, causing a sell-off in bonds. With the next policy meeting slated for early November, investors closely monitored any statements from the Fed on what their next rate decision might be. Consequently, the 10-year US Treasury benchmark yield spiked to as high as 4.95% before ending 35 basis points higher month-on-month at 4.93%.

In the local space, inflation for the month of September surged to 6.1% year-on-year from the 5.3% print in August. The figure was higher than market expectations (consensus estimate: +5.7% YoY) and was brought about by rising food and fuel prices. It also marked the second straight month of inflation rising once more, causing some speculation that the Bangko Sentral ng Pilipinas (BSP) could be more hawkish moving forward. The BSP announced a 25-basis point off-cycle hike on the last Thursday of the month, citing supply-side pressures that could cause additional second-round effects. BSP Governor Eli Remolona noted that the central bank would remain vigilant of its inflation target and would be ready to adjust policy rates as necessary.

Fund Performance. The Fund returned 0.38% for the month, 9 basis points below its benchmark.

Fund Strategy. The Fund will maintain its duration of less than 1. Expectations of rising rates moving forward may provide an opportunity for better yielding investment outlets.
