OUTLOOK AND STRATEGY

Market Review. The JP Morgan Asia Credit Index (JACI) Philippines lost 1.54% in February as Philippine dollardenominated bonds tracked movements in US Treasuries.

Global bonds surrendered gains made in January as various data released for the month reaffirmed the strength of the US economy. Both retails sales and jobs data surprised to the upside, while inflation came in higher than expected at 6.4% year-on-year. The European Central Bank, Bank of England and US Federal Reserve all hiked rates at the beginning of February, in line with expectations. However, statements following these policy actions were perceived to be more hawkish, as some policymakers highlighted that inflation remained too high, and further tightening would be needed. The 10-year US Treasury yield rose 41 basis points to close the month at the 3.92% level.

In the local economic space, inflation for the month of January spiked to 8.7% year-on-year, higher than the 8.1% posted in December. This marked the highest year-on-year change since 2008, as food and fuel prices continued to be affected by supply-side pressures. Consequently, the Bangko Sentral ng Pilipinas (BSP) decided to raise benchmark rates by 50 basis points during their Monetary Policy meeting held February 16. BSP officials reiterated that they remained prepared to adjust policy settings as needed, given persistently high CPI levels, as well as central bank tightening measures globally.

Fund Performance. The Fund returned 0.28% in February, below its benchmark by 7 basis points.

Fund Strategy. The Fund will maintain its duration of less than 1. Expectations of rising rates moving forward may provide an opportunity for better yielding investment outlets.
