## FUND PERFORMANCE AND STATISTICS AS OF MARCH 31, 2023

(Purely for reference purposes and is not a guarantee of future results)

## **RELATED PARTY TRANSACTIONS\***

The Fund has transactions and outstanding investments including deposits, investment in the share/s of stocks, and/or debt issuances of the following companies related to BPI Wealth - A Trust Corporation ("BPI Wealth"):

Bank of the Philippine Islands – USD 24.12 Mn ACEN Corporation – USD 1.92 Mn

Investments in the said outlets were approved by BPI Wealth's Board of Directors. Likewise, all related party transactions are conducted on an arm's length and best execution basis and within established limits.

\* Related party in accordance with BPI Wealth's internal policy.

**Market Review**. The JP Morgan Asia Credit Index (JACI) Philippines returned 1.59% in March as Philippine dollardenominated bonds tracked movements in US Treasuries.

Global bonds rallied in March as investors adopted a flight-to-safety stance amid concerns over the health of the banking sector. The US Federal Reserve responded swiftly to the closure of Silicon Valley Bank, ensuring depositors that all their deposits would be protected. Central banks across the globe likewise reiterated their commitment to provide liquidity and stabilize markets as needed. During its March Federal Open Market Committee (FOMC) meeting, the Fed opted to hike rates by another 25 basis points, citing the continued need to cool inflation even as the new challenge of maintaining financial stability emerged. Both US CPI and employment data released during the month continued to support the case for further policy tightening. For the month, the 10-year US Treasury yield fell by 45 basis points to close at 3.47%.

In the local economic space, inflation for the month of February settled at 8.6% year-on-year, marginally lower than the 8.7% in January. Though the figure was lower than market expectations, prices of food and fuel continued to be affected by supply-side pressures. Consequently, the Bangko Sentral ng Pilipinas (BSP) decided to raise benchmark rates by 25 basis points during their Monetary Policy meeting held March 23. BSP officials reiterated that they remained prepared to adjust policy settings as needed, given persistently high CPI levels, as well as central bank tightening measures globally.

Fund Performance. The Fund returned 0.33% in March, 6 basis points below its benchmark.

**Fund Strategy**. The Fund will maintain its duration of less than 1. Expectations of rising rates moving forward may provide an opportunity for better yielding investment outlets.
