**Country Risk:** Investors are exposed to the risk of loss arising from negative developments in the political, economic and social conditions of the focus countries of the underlying securities of the target fund, which may adversely affect the value of the feeder fund.

**FX Risk:** Investors are exposed to the risk of loss from a decline in the market value of the target fund when the market value of foreign currency denominated securities held by the target fund are translated to USD.

## OUTLOOK AND STRATEGY

**Market Review.** Global equity markets rose in March. The failures of US regional banks and the acquisition of Credit Suisse dampened investor sentiment and prompted fears of contagion across global markets. Central banks swiftly took action and provided support and liquidity to troubled banks. Investor concerns eased and equity markets recovered towards the latter part of the month. Despite a volatile backdrop amid the events in the banking sector, global central banks continued with their aggressive monetary policies as labor markets remained robust and inflation is still above target. The US Federal Reserve and the European Central Bank raised interest rates by 25 and 50 basis points, respectively.

The MSCI ACWI Information Technology Index rose by 9.5%, outperforming broad equity markets. Investors rotated into the technology sector, particularly large-cap technology names with strong quality metrics.

**Fund Performance.** The fund returned 5.92% in March, lagging the benchmark by 357 basis points. Underweight position in Microsoft detracted from performance as investors sought safety in equity markets by adding to large-cap names with strong balance sheets.

**Fund Strategy.** For 2023, the technology sector is expected to remain challenged in the earlier part of the year as rate hikes and weaker-than-expected earnings will likely remain as headwinds for the sector. The second half of the year is expected to be more favorable for technology stocks on the back of slowing or halted rate hikes and potentially stronger earnings compared to conservative expectations. While growth assets have been penalized due to rising rate concerns, the companies within the portfolio continue to be underpinned by compelling fundamentals and powerful long-term secular growth drivers. The secular growth trends driving technology are multi-year transformations that are expected to persist, regardless of the macroeconomic environment or geopolitical risk. The fund will continue to focus on these long-term secular themes such as artificial intelligence, cloud computing, electric vehicles, metaverse and quantum computing.
