## OUTLOOK AND STRATEGY

**Market Review.** Global equity markets rose in December as we saw an extension of the rally driven by expectations of a policy pivot and effectively, rate cuts in 2024. The US Federal Reserve held rates steady, but the dot plot showed a lower projected policy rate for 2024, reflecting expectations of a total of 75 basis point cuts in 2024 by FOMC members. December delivered supportive US economic data. Jobs report for the month showed 216,000 jobs added, above estimates of 160,000. November unemployment held steady at 3.7%, confirming the view of a strong labor market. US inflation continued to trend lower with November CPI posting at 3.1%. The improvement in sentiment and supportive data releases has continued to drive rate cut expectations with peak market pricing in a total of 150 basis point cuts in 2024. Investor optimism in rate cut expectations drove yields to move lower and boosted risk assets, including global equities. MSCI All Country world returned 4.83% for the month, with developed outperforming emerging markets. The MSCI ACWI Information Technology Index returned +4.5% for the month, led by the semiconductor sub-sector.

**Fund Performance.** The fund returned 5.39% in December, outperforming the benchmark by 87 basis points. Security selection within the software sub-sector helped performance.

**Fund Strategy.** Mixed macroeconomic indicators continue in 2023, leading enterprises to remain conservative with IT spending. We believe that concerns about interest rates and inflation have largely been priced into tech equities. Recent advancements in artificial intelligence have brought new momentum into the sector, negating the impact from macro weakness. While the initial beneficiaries were the mega-cap technology names building the infrastructure to train AI models, we see wide opportunities in the space aligned with the theme moving forward. While growth assets have been penalized due to rising rate concerns, the companies within the portfolio continue to be underpinned by compelling fundamentals and powerful long-term secular growth drivers. The secular growth trends driving technology are multi-year transformations that are expected to persist, regardless of the macroeconomic environment or geopolitical risk. The fund will continue to focus on these long-term secular themes such as artificial intelligence, cloud computing, electric vehicles, metaverse, space and quantum computing.
