## OUTLOOK AND STRATEGY

**Market Review.** The local equities market sharply declined given the combination of illiquid market condition and worrisome macroeconomics data on both local and global space which forced investors to err on the side of caution. According to the minutes of the latest FOMC meeting of US Federal Reserve's (The Fed), officials spoke with a hawkish tone – expressing concerns on inflation pace which might lead to more rate hikes. Moreover, selling pressure intensified following the release of the 2nd quarter Philippines GDP which came out a shocker. The local economy grew at 4.3% which was way below consensus estimates of 6.0% - mostly due to the steep decline in government expenditures (-7.0% YoY). The PSEi dropped by 6.3% to close at 6,175.25 in August.

Activity in August improved as Average Daily Turnover came in at Php5.21 billion from Php3.46 billion in the prior month. Foreigners remained net sellers at US\$131 million with large flows coming out of index heavyweights SM and SMPH. Moreover, the MSCI quarterly rebalancing which indicated a reduction in the country's weighting further added to the sell-off.

For stock performances, the top three gainers for the month were as follows: SCC (+10.92%), GTCAP (+5.05%) and MPI (+3.70%). Meanwhile, the bottom three index performers included: CNVRG (-23.07%), JGS (-15.10%) and AEV (-12.64%).

**Fund Performance.** The fund underperformed its benchmark by 1 basis points in August with a return of -6.32%.

**Fund Strategy.** The Fund will maintain its defensive stance given the heightened volatility from internal and external sources. The elevated interest rate environment, inflation and slow growth continue to drag sentiment. The fund will take advantage of market swings to rebalance in favour of high-quality names.
