OUTLOOK AND STRATEGY

Market Review. The Philippine Stock Exchange Index (PSEi) surged at the start of the year, rising as high as 7,137.62 intraday last 24 January. The market was propelled by several factors such as improved risk-appetite for emerging market (EM) securities on the back of China's reopening story, dovish signals from central banks and a slew of strong local economic indicators (4Q2022 Philippine GDP at 7.2%, the Peso strengthening further to Php54/USD level). However, the index fell and went into consolidation mode towards the latter part of the month, reversing a chunk of earlier gains. The PSEi closed at 6,793.25 or 3.45% higher month-on-month in January.

For January, trading activity was light compared to the previous month with the average daily value turnover at USD114.9 million (vs USD222 million in December). Foreigners were "Net Buyers" at USD122 million while foreign participation clocked in at 37%.

For the individual stock performances, the top index gainers for the month included: MONDE (+19.13%), MPI (+18.13%) and GTCAP (+17.24%). Meanwhile, the bottom index performers were as follows: ACEN (-8.14%), GLO (-7.34%) and SCC (-7.25%).

Fund Performance. The fund underperformed its benchmark by 130 basis points in January with a return of 2.15%.

Fund Strategy. The Fund will maintain its defensive stance as volatility continue to persist from a global and local macroeconomic standpoint. Downside risks include elevated interest rate, high inflation, global recession fears, and geopolitical risks. However, we will take advantage of excessive market rallies to rebalance on quality names.
