INVESTMENT OBJECTIVE AND STRATEGY

The Fund intends to achieve for its participants liquidity and stable income derived from a diversified portfolio of primarily short-term fixed income instruments. The Fund aims to provide returns in excess of the return of the 91-day Philippine Treasury Bill.

CLIENT SUITABILITY

A client profiling process shall be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust / Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

The BPI PERA Money Market Fund is suitable only for investors who:

- Are classified as moderate based on their risk profile
- Have an investment horizon of at least three (3) years.

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk: Investors are exposed to adverse changes in the prices of domestic fixed income securities due to a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise in interest rates include adverse market conditions, issuer-specific factors / events and/or negative developments in domestic political and economic conditions.

Liquidity Risk: Possibility to experience losses due to the fund's inability to convert assets into cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price.

Related Party Risk: Risk of any actual or potential conflicts of interest in handling of related party transactions.

Credit/Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

OUTLOOK AND STRATEGY

Market Review. The BPI Money Market Index returned 0.41% in September, while benchmark short-term government yields saw no movement for the month. Average daily trading volume for the month amounted to PHP18.22 billion higher than August's PHP16.82 billion with trades mostly seen on the short-end of the curve.

The Bureau of the Treasury (BTr) held four Treasury Bill auctions in September. During its last T-Bill auction for the month, the three tenors were fully awarded with the average yield of the 364-day paper falling to 6.119% while the 91-, and 182-day papers rose to 5.595%, and 5.968%, respectively. The BSP increased its weekly offering of BSP Bills to PHP40 billion for the 56-day paper and PHP120 billion for the 28-day paper by the end of the month. Over the course of September, a total of Php747 billion worth of 28- and 56-day BSP Bills were issued at weighted average yields of 6.719% and 6.724%, respectively. Towards the end of the month, the BTr released the October auction schedule with four Treasury Bill auctions and only three FXTN issuances (5-, 7-, and 10-year tenors) with an offer size of PHP30 billion each.

In the local space, August headline inflation surged to 5.3% year-on-year, from last month's 4.7%. The food and transport costs were the main drivers of resurgence in inflation reversing the six straight months of deceleration. The Bangko Sentral ng Pilipinas (BSP) kept its policy rate at 6.25% during their September Monetary Board meeting. BSP Governor Eli Remolona mentioned that a possibility of rate hike is still on the table and the magnitude will depend on the inflation data and other crucial economic data. The BSP revised its inflation forecast upward, settling at 5.8% (from 5.6%) for 2023 and 3.5% (from 3.3%) for 2024 due to higher-than-expected inflation, increases in global and oil prices, and recent depreciation of Peso.

Fund Performance. The Fund returned 0.81% during the month of September, outperforming its benchmark by 46 basis points.

Fund Strategy. The Fund continues to maintain its holdings in short duration government securities. Expectations of rising rates moving forward may provide an opportunity for better yielding investment outlets.
