OUTLOOK AND STRATEGY

Market Review. The BPI Money Market Index returned 0.48% in May, as benchmark short-term government yields fell by 7 basis points (bps) on average. Average daily trading volume rose to PHP21.77 billion from April's PHP15.42 billion with trades mostly seen on the long-end of the curve.

The Bureau of the Treasury (BTr) held five Treasury Bill auctions in May. The last auction for the month saw the 91- and 182-, and 364-day papers fully awarded at average rates of 5.783, 5.879%, and 5.948%, respectively. Over the course of May, a total of Php620 billion worth of BSP Bills were issued at a weighted average yield of 6.735%. Towards the end of the month, the BTr released the June auction schedule with four Treasury Bill auctions and five FXTN issuances (9-, 5-, 15-, 6-, and 9-year tenors) each with an offer size of PHP25 billion.

In the local space, April headline inflation fell further to 6.6% year-on-year, lower than market expectations of 7.0% year-on-year. The surprise decline in the April figure resulted from lower energy prices and favourable base effects driving slower food, transport, and utility inflation. The Philippine GDP grew by 6.4% year-on-year in 1st Quarter of 2023, driven by strong household consumption, a boost in capital formation, and increased government spending. During its periodic policy meeting, the Bangko Sentral ng Pilipinas (BSP) paused its tightening cycle and kept its policy rate unchanged at 6.25% as headline inflation continued in a downward trend. The central bank officials reiterated that they remained prepared to adjust policy settings as needed and lowered its inflation forecast for 2023 and 2024 to 5.5% and 2.8%, respectively.

Fund Performance. The Fund returned 0.83% during the month of May, outperforming its benchmark by 42 basis points.

Fund Strategy. The Fund continues to maintain its holdings in short duration government securities. Expectations of rising rates moving forward may provide an opportunity for better yielding investment outlets.
