## KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

**Interest Rate Risk:** Investors are exposed to adverse changes in the prices of domestic fixed income securities due to a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions..

**Equity Price Risk:** Investors are exposed to adverse changes in the prices of stocks listed in the Philippine Stock Exchange, which may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.

**Liquidity Risk:** Investors are exposed to the risk of loss due to the fund's inability to convert fixed income and equity security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

**Related Party Risk:** Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt and equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.

**Credit/ Default Risk:** Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

## OUTLOOK AND STRATEGY

**Market Review.** The BPI Government Bond Index returned 1.54% in May as the local yield curve flattened further, dropping by 24 basis points (bps) on average. Average daily trading volume rose to PHP21.77 billion from April's PHP15.42 billion with trades mostly seen on the long-end of the curve.

The Bureau of the Treasury (BTr) held four FXTN auctions in May. The 6-year FXTN 10-64, 9-year FXTN 10-69, 13-year FXTN 13-1, and 7-year FXTN 7-69 re-issuances were all fully awarded at average yields of 5.925%, 5.732%, 5.845%, and 5.774%, respectively. Towards the end of the month, the BTr released the June auction schedule with four Treasury Bill auctions and five FXTN issuances (9-, 5-, 15-, 6-, and 9-year tenors) each with an offer size of PHP25 billion.

In the local space, April headline inflation fell further to 6.6% year-on-year, lower than market expectations of 7.0% year-on-year. The surprise decline in the April figure resulted from lower energy prices and favorable base effects driving slower food, transport, and utility inflation. The Philippine GDP grew by 6.4% year-on-year in 1st Quarter of 2023, driven by strong household consumption, a boost in capital formation, and increased government spending. During its periodic policy meeting, the Bangko Sentral ng Pilipinas (BSP) paused its tightening cycle and kept its policy rate unchanged at 6.25% as headline inflation continued in a downward trend. The central bank officials reiterated that they remained prepared to adjust policy settings as needed and lowered its inflation forecast for 2023 and 2024 to 5.5% and 2.8%, respectively.

The Philippine Stock Exchange Index (PSEi) retreated in May and this could be attributed to the following concerns: 1) Worries over potentially more rate hikes from US Federal Reserve 2) US Debt Ceiling deadlock, and 3) Uncertainties on Bangko Sentral ng Pilipinas' (BSP) monetary policy stance. The weakness of the Philippine Peso against the greenback (US Dollar) after falling to a six-month low at Php56.31 and the MSCI rebalancing – where the Philippines had a general down-weight causing significant net foreign outflow, further added downward pressure to share prices. The local bourse index dropped 2.2% to below 6,500-mark at 6,477.

Activity for the month of May improved with Average Daily Turnover registering at Php 5.04 billion or 18.2% higher than prior period's Php4.27 billion. This was mainly driven by the MSCI rebalancing event at close of business (COB) on the last trading day of May. In terms of flows, foreigners reverted to net-selling in May at US\$81 million driven mainly by the MSCI rebalancing. Foreign participation was higher at 53% in the same period.

On stock performance in May, the top gainers are as follows: GTCAP (+7.95%), JFC (+4.71%) and SM (+3.80%). Meanwhile, here are the biggest laggards for the month: MONDE (-13.37%), ICT (-10.14%) and CNVRG (-7.80%).

**Fund Performance.** The Fund slid by 0.04% in May, beating the benchmark by 31 bps. Year-to-date, the Fund registered a gain of 1.36%, below the benchmark by 12 bps.

**Fund Strategy.** The Fund looks to maintain its underweight duration position given expectations of rising interest rates moving forward. With inflation having exceeded the government's target range, the BSP remains vigilant in monitoring supply side pressures and potential second-round effects. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.

The Fund will continue to be defensive as volatility is expected to persist across financial markets. High global inflation will likely keep interest rates elevated. We will take advantage of the volatility in buying quality names on dips and sell on excessive market rallies.
