KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk: Investors are exposed to adverse changes in the prices of domestic fixed income securities due to a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions..

Equity Price Risk: Investors are exposed to adverse changes in the prices of stocks listed in the Philippine Stock Exchange, which may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the fund's inability to convert fixed income and equity security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt and equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.

Credit/ Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

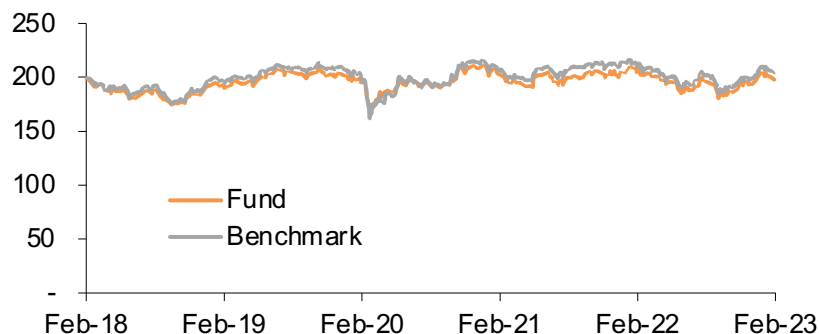

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

OUTLOOK AND STRATEGY

Market Review. The BPI Government Bond Index returned -0.47% in February, with benchmark government yields rising 21 basis points (bps) on average. Average daily trading volume fell to PHP11.91 billion from January's PHP17.55 billion with trades mostly seen on the long-end of the curve.

The Bureau of the Treasury (BTr) only held two FXTN auctions in February. The 13-year FXTN 25-7 and 10-year FXTN 10-69 were fully awarded at average yields of 6.197% and 6.258%, respectively. Two FXTN auctions were cancelled after the BTr announced its first Retail Treasury Bond (RTB) issuance for the year. The government priced the 5.5-year RTB (RTB5-17) at a coupon rate of 6.125% and raised Php283.71 billion from the sale. Towards the end of the month, the BTr released its March auction schedule with five Treasury Bill auctions and five FXTN issuances (6-, 10-, 13-, 20-, and 7-year tenors).

In the local space, January inflation exceeded expectations printing 8.7% year-on-year, the highest since November 2008. The inflation uptrend was mainly driven by housing, electricity, water, fuel, and food-related expenses. Consequently, the Bangko Sentral ng Pilipinas (BSP) hiked its policy rate by 50 basis points to 6.00% during the first Monetary Board meeting of the year, to curb demand and limit inflation. The central bank raised its 2023 inflation forecast to 6.1% but maintained its 2024 forecast at 3.1%.

The Philippine Stock Exchange Index (PSEi) declined in February, reversing most gains in January. Risk-off sentiment prevailed after inflation from both US (+6.4%) and Philippines (+8.7%) came out higher-than-expected which may signal a prolonged high interest-rate environment. Meanwhile, liquidity events such as PSE and MSCI rebalancing took effect this month, increasing trading activity. The local bourse dropped 3.5% to close at 6,556.20.

In terms of trading activity, the PSE was more active in February with average daily value turnover at USD146.4 mil or 1% higher than USD114.9 million recorded in the prior month. Meanwhile, foreigners became "Net Sellers" for the month with US\$142 million exiting the country. Foreign participation came in at 48%.

For the individual stock performances, the top index gainers for the month included: SMC (+15.12%), MER (+13.26%) and BPI (+4.57%). Meanwhile, the bottom index performers were as follows: GLO (-12.13%), AC (-11.60%) and ACEN (-9.43%).

Fund Performance. The Fund registered a loss of 2.22% in February, below the benchmark by 26 bps. Year-to-date, the Fund registered a gain of 1.36%, below the benchmark by 12 bps.

Fund Strategy. The Fund looks to maintain its underweight duration position given expectations of rising interest rates moving forward. With inflation having exceeded the government's target range, the BSP remains vigilant in monitoring supply side pressures and potential second-round effects. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.

The Fund will remain defensive as volatility is expected to persist across financial markets on the back of elevated global inflation. This high inflationary environment could influence Central Banks to maintain interest rates higher for longer until it can contain consumer prices to manageable levels. The fund will take advantage in buying quality names on dips and sell on excessive market rallies.
