KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk:	Investors are exposed to adverse changes in the prices of domestic fixed income securities due to a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise in interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions..
Equity Price Risk:	Investors are exposed to adverse changes in the prices of stocks listed in the Philippine Stock Exchange, which may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.
Liquidity Risk:	Investors are exposed to the risk of loss due to the fund's inability to convert fixed income and equity security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.
Related Party Risk	Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt and equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.
Credit/ Default Risk	Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

OUTLOOK AND STRATEGY

Market Review. The BPI Government Bond Index returned 0.59% in March as the benchmark government yield curve flattened with the short-end of the curve rising and the long-end falling. Average daily trading volume rose to PHP14.83 billion from February's PHP11.91 billion with trades mostly seen on the long-end of the curve.

The Bureau of the Treasury (BTr) recently decreased each auction's offer size to PHP25 billion for the five FXTN issuances in March. The 6-year FXTN 7-67, 10-year FXTN 10-69, 13-year FXTN 25-7, 20-year FXTN 20-25, and 7-year FXTN 7-68 were all fully awarded at average yields of 6.172%, 6.378%, 6.167%, 6.631%, and 6.162%, respectively. Towards the end of the month, the BTr released the April auction schedule with four Treasury Bill auctions and four FXTN issuances (3-, 9-, 13-, and 7-year tenors) each with an offer size of PHP25 billion.

In the local space, February inflation printed lower than market expectations at 8.6% year-on-year. The decline in the February figure can be attributed to slower transport costs and flat utility inflation. Despite easing headline inflation, food inflation accelerated further as supply-side constraints continue. Consequently, the Bangko Sentral ng Pilipinas (BSP) hiked its policy rate by 25 basis points to 6.25% during the March Monetary Board meeting, reiterating its commitment to fighting elevated inflation. Furthermore, the central bank trimmed its 2023 inflation forecast to 6.0% from 6.1%.

The Philippine Stock Exchange Index (PSEi) displayed a roller coaster performance for the month following a slew of market moving events globally. The PSEi initially rose to as much as 2.4% before the news on Silicon Valley Bank (SVB) and Credit Suisse's collapse which sent shockwaves through the global financial system. The market also priced in the direction of the elevated interest rates and inflation.

Meanwhile, on the local economic front, the Bangko Sentral ng Pilipinas (BSP) raised policy rates by 25 basis points to 6.25% as Philippine Inflation remained high at 8.6%. In terms of inflation forecast, the BSP adjusted the 2023 and 2024 to 6.0% (from 6.1%) and 2.9% (from 3.1%), respectively.

The local bourse gave up 0.9% to close at 6,499.68 in March.

In terms of average daily turnover, the local bourse was less active for the month at US\$130.9 million or 10.6% lower compared to 146.4 million registered in February. Meanwhile, Foreigners remained net sellers with an outflow of US\$498 million, further stretching the Year-to-date figure to US\$518 million. Foreign participation clocked in at 47% (from 48%).

For the individual stock performances, the top three index gainers for the month are as follows: TEL (+10.51%), DMC (+8.90%) and SCC (+7.83%). Meanwhile, the bottom three index performers include: CNVRG (-21.28%), MONDE (-18.66%) and AEV (-10.37%)

Fund Performance. The Fund registered a gain of 0.57% in March, outperforming the benchmark by 39 bps. Meanwhile, the YTD performance of the Fund reported a gain of 2.68%, outperforming its benchmark by 39 bps.

Fund Strategy. The Fund looks to gradually add to its duration position as interest rates are expected to stabilize in the near term. Inflation remains above the government's target range, and the BSP will be vigilant in monitoring supply side pressures moving forward. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.

The Fund will continue to be defensive as volatility is expected to persist across financial markets. High global inflation will likely keep interest rates elevated. We will take advantage of the volatility in buying quality names on dips and sell on excessive market rallies.
