### **RELATED PARTY TRANSACTIONS\*\***

The Fund has transactions and outstanding investments including deposits, investment in the share/s of stocks, and/or debt issuances of the following companies related to the BPI Wealth - A Trust Corporation ("BPI Wealth"):

ACEN Corporation – Php 11.28 Mn, Ayala Corporation – Php 20.22 Mn, Ayala Land, Inc. – Php 32.32 Mn, Bank of the Philippine Islands – Php 22.50 Mn, Globe Telecom – Php 12.76 Mn

Investments in the said outlets were approved by the BPI Wealth's Board of Directors. Likewise, all related party transactions are conducted on an arm's length and best execution basis and within established limits.

\*\*Related party in accordance with BPI Wealth's internal policy.

**Market Review.** The BPI Government Bond Index returned 1.54% in May as the local yield curve flattened further, dropping by 24 basis points (bps) on average. Average daily trading volume rose to PHP21.77 billion from April's PHP15.42 billion with trades mostly seen on the long-end of the curve.

The Bureau of the Treasury (BTr) held four FXTN auctions in May. The 6-year FXTN 10-64, 9-year FXTN 10-69, 13-year FXTN 13-1, and 7-year FXTN 7-69 re-issuances were all fully awarded at average yields of 5.925%, 5.732%, 5.845%, and 5.774%, respectively. Towards the end of the month, the BTr released the June auction schedule with four Treasury Bill auctions and five FXTN issuances (9-, 5-, 15-, 6-, and 9-year tenors) each with an offer size of PHP25 billion.

In the local space, April headline inflation fell further to 6.6% year-on-year, lower than market expectations of 7.0% year-on-year. The surprise decline in the April figure resulted from lower energy prices and favorable base effects driving slower food, transport, and utility inflation. The Philippine GDP grew by 6.4% year-on-year in 1st Quarter of 2023, driven by strong household consumption, a boost in capital formation, and increased government spending. During its periodic policy meeting, the Bangko Sentral ng Pilipinas (BSP) paused its tightening cycle and kept its policy rate unchanged at 6.25% as headline inflation continued in a downward trend. The central bank officials reiterated that they remained prepared to adjust policy settings as needed and lowered its inflation forecast for 2023 and 2024 to 5.5% and 2.8%, respectively.

The Philippine Stock Exchange Index (PSEi) retreated in May and this could be attributed to the following concerns: 1) Worries over potentially more rate hikes from US Federal Reserve 2) US Debt Ceiling deadlock, and 3) Uncertainties on Bangko Sentral ng Pilipinas' (BSP) monetary policy stance. The weakness of the Philippine Peso against the greenback (US Dollar) after falling to a six-month low at Php56.31 and the MSCI rebalancing – where the Philippines had a general down-weight causing significant net foreign outflow, further added downward pressure to share prices. The local bourse index dropped 2.2% to below 6,500-mark at 6,477.

Activity for the month of May improved with Average Daily Turnover registering at Php 5.04 billion or 18.2% higher than prior period's Php4.27 billion. This was mainly driven by the MSCI rebalancing event at close of business (COB) on the last trading day of May. In terms of flows, foreigners reverted to net-selling in May at US\$81 million driven mainly by the MSCI rebalancing. Foreign participation was higher at 53% in the same period.

On stock performance in May, the top gainers are as follows: GTCAP (+7.95%), JFC (+4.71%) and SM (+3.80%). Meanwhile, here are the biggest laggards for the month: MONDE (-13.37%), ICT (-10.14%) and CNVRG (-7.80%).

**Fund Performance.** The Fund registered a gain of 0.56% in May, outperforming the benchmark by 15 bps. Meanwhile, the YTD performance of the Fund reported a gain of 4.30%, outperforming its benchmark by 58 bps.

**Fund Strategy.** The Fund will remain defensive as volatility heightens across global markets. Increasing worries over a potential US recession, sticky global inflation and elevated interest rates continue to hamper investor sentiment. However, we will take advantage of the volatility in buying quality names on dips and sell on excessive market rallies.

The Fund will continue to be defensive as volatility is expected to persist across financial markets. Stubbornly high global inflation is keeping interest rates elevated. However, we will take advantage of the volatility in buying quality names on dips and sell on excessive market rallies.

# LIST OF PROSPECTIVE INVESTMENTS
