KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk: Investors are exposed to adverse changes in the prices of domestic fixed income securities due to a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise in interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions..

Equity Price Risk: Investors are exposed to adverse changes in the prices of stocks listed in the Philippine Stock Exchange, which may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the fund's inability to convert fixed income and equity security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt and equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.

Credit/ Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

OUTLOOK AND STRATEGY

Market Review. The Philippine Stock Exchange Index (PSEi) finished the last month of the year on a strong note. The PSEi rose along with the global markets' rally on optimism spurred by the US Federal Reserve's (The Fed) decision to hold rates. Furthermore, the Fed discussed cutting rates in 2024 bolstering the dovish signal. On the local economic front, November inflation print was recorded at 4.1%, or lower than the 4.4% estimate. The PSEi rose by 3.64% month-on-month to close at 6,450.04 in December.

Trading activity improved to end the year, with average daily turnover registering at US\$89 mil or +25.4% month-on-month. Meanwhile, foreign buying was sustained for another month at US\$18 million with participation level at 49% in December. Foreigners continued to switch from banks to properties given the expected interest-rate scenario.

In terms of stock performance, the top three gainers for the month include: AGI (+15.10%), ICT (+14.37%) and JFC (+10.94%). Meanwhile, the bottom three performers were: ACEN (-8.75%), SMC (-5.46%) and AEV (-4.70%).

The BPI Government Bond Index returned 1.29% in December as the local yield curve bull flattened, dropping 18 basis points (bps) on average. Average daily trading volume for the month amounted to PHP15.48 billion significantly lower than November's PHP29.54 billion with trades mostly seen on the long end of the curve.

The Bureau of the Treasury (BTr) held only one FXTN auction in December. The 10-year FXTN 10-71, was fully awarded at an average yield of 6.224%. Meanwhile, the scheduled 15-year FXTN issuance was cancelled. Towards the end of the month, the BTr released the auction schedule for the first quarter of 2024, with weekly Treasury Bill auctions and monthly FXTN issuances (3-, 5-, 7- and 10-year tenors) and an additional 20-year issuance in February with an offer size of PHP30 billion each.

In the local space, November headline inflation fell sharply to 4.1% year-on-year from 4.9% last month. The slowdown in inflation was driven by all major subsectors with food inflation decelerating to 5.7% year-on-year from the previous 7% and transport cost contracting by 0.8% year-on-year due to lower global oil prices. The BSP retained its key policy rate at 6.5% during its last monetary board meeting for the year. Despite the inflation figure trending lower, BSP Governor Eli Remolona noted that risks to the inflation outlook remain tilted to the upside.

Fund Performance. The Fund registered a gain of 1.96% in December, underperforming the benchmark by 4 bps. Meanwhile, the YTD performance of the Fund reported a gain of 5.49%, outperforming its benchmark by 15 bps.

Fund Strategy. The Fund looks to maintain its current duration position as interest rates are expected to stabilize over the medium term. Inflation remains above the government's target range, and the BSP will be vigilant in monitoring supply side pressures moving forward. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.

The Fund will continue to be defensive as volatility could persist given thin market liquidity and as interest rates remain elevated. The Fund will focus on companies with leading market capitalization.
