OUTLOOK AND STRATEGY

Market Review. The BPI Government Bond Index returned 0.14% in September as the belly of the curve rose while the long-end of the curve dropped. Average daily trading volume for the month amounted to PHP18.22 billion higher than August's PHP16.82 billion with trades mostly seen on the short-end of the curve.

The Bureau of the Treasury (BTr) held four FXTN auctions in September. The 3-year FXTN 3-29 and 7-year FXTN 7-70 re-issuances were partially awarded at average yields of 6.222% and 6.370% while the 10-year FXTN 10-71 re-issuance was fully awarded at an average yield of 6.420%. During the last week of the month, another 3-year FXTN 3-29 re-issuance was held and got rejected by the BTr. Had the BTr fully awarded the paper, average yields would have risen to 6.482%. Towards the end of the month, the BTr released the October auction schedule with four Treasury Bill auctions and only three FXTN issuances (5-, 7-, and 10-year tenors) with an offer size of PHP30 billion each.

In the local space, August headline inflation surged to 5.3% year-on-year, from last month's 4.7%. The food and transport costs were the main drivers of resurgence in inflation reversing the six straight months of deceleration. The Bangko Sentral ng Pilipinas (BSP) kept its policy rate at 6.25% during their September Monetary Board meeting. BSP Governor Eli Remolona mentioned that a possibility of rate hike is still on the table and the magnitude will depend on the inflation data and other crucial economic data. The BSP revised its inflation forecast upward, settling at 5.8% (from 5.6%) for 2023 and 3.5% (from 3.3%) for 2024 due to higher-than-expected inflation, increases in global and oil prices, and recent depreciation of Peso.

The local equities market rebounded by the end of September to close the month in positive territory. Early to middle of the month, weakness was experienced as the index dipped to an intraday low of 5,998 amid FTSE's rebalancing movements. Sentiment was further dampened as headline inflation accelerated to 5.3% in August 2023 (vs 4.7% in July). However, losses were fully recouped by the end of September as investors deployed proceeds from the tender offer of Metro Pacific, Inc. and bottom-fishing of bombed out names with deep value. Overall, the PSEi went up by 2.4% MoM closing at 6,321.24 in September.

Trading activity during the month further improved as changes in FTSE and PSEi constituents triggered portfolio rebalancing. Average Daily Turnover came in at Php6.58 billion from Php5.21 billion in August, albeit foreigners continued to be net sellers at US\$179 million.

For stock performances, the top three gainers for the month were as follows: MONDE (+25.42%), CNVRG (+23.55%) and SCC (+9.06%). Meanwhile, the bottom three index performers included: BLOOM (-8.68%), UBP (-6.52%) and JFC (-3.21%).

Fund Performance. The Fund registered a gain of 0.75% in September, underperforming the benchmark by 7 bps. Meanwhile, the YTD performance of the Fund reported a gain of 2.57%, outperforming its benchmark by 15 bps.

Fund Strategy. The Fund looks to maintain its current duration position as interest rates are expected to stabilize over the medium term. Inflation remains above the government's target range, and the BSP will be vigilant in monitoring supply side pressures moving forward. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.

The Fund will maintain its defensive stance amidst the persisting high inflationary environment. This, along with elevated interest rate will continue to pull down market sentiment. The fund will be nimble in maximizing market swings to rebalance in favor of high quality names.
