KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk: The fund invests in a long-term portfolio of domestic government and corporate securities, exposing investors to the risk of loss arising from a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Credit/ Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt securities issued by related parties, as well as the execution of trade transactions with related counterparties.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

OUTLOOK AND STRATEGY

Market Review. The BPI Government Bond Index returned 3.22% in November as the local yield curve bull steepened, dropping 69 basis points (bps) on average. Average daily trading volume for the month amounted to PHP29.54 billion significantly higher than October's PHP10.15 billion with trades mostly seen on the long end of the curve.

The Bureau of the Treasury (BTr) held five FXTN auctions in November. The first issuance, 5-year FXTN 10-64, was fully rejected by the BTr. Had the BTR fully awarded the paper, average yields would have risen to 7.196%. The 7-year FXTN 7-70 and 10-year FXTN 10-71 re-issuances were fully awarded at average yields of 6.807% and 6.781%, respectively. The last two issuances of the month, 15-year FXTN 20-23 and 6-year FXTN 7-68, had decreased offer sizes of PHP20 billion each and were fully awarded at average yields of 6.593% and 6.099%, respectively. Towards the end of the month, the BTr released the December auction schedule with two Treasury Bill auctions and two FXTN issuances (10- and 15-year tenors) with an offer size of PHP20 billion each.

In the local space, October headline inflation dropped to 4.9% year-on-year from the 6.1% print in September. The slowdown in inflation was mainly driven by lower food inflation with rice prices decreasing following peak harvest season and import arrivals. The third quarter GDP print came out at 5.9% year-on-year, exceeding market expectations of 4.7%. Coming from a contraction in the previous quarter, the economy rebounded given the 6.7% rise in government spending. Consequently, the Bangko Sentral ng Pilipinas (BSP) held its key policy rate at 6.5% during its November Monetary board meeting after delivering an off-cycle rate hike in the previous month. The central bank perceives the current policy settings to be appropriate until inflation move towards the target range. The BSP lowered its forecast for FY 2024 inflation to 4.4% from the previous 4.4% and 2025 to 3.4% from 3.5%. The central bank noted that growth outlook remains intact, and they remain ready to tighten further if needed.

Fund Performance. The Fund posted a return of 3.23% for the month of November, outperforming its benchmark by 1 bp. Meanwhile, the YTD performance of the Fund reported a gain of 6.12%, underperforming its benchmark by 74 bps.

Fund Strategy. The Fund looks to maintain its current duration position as interest rates are expected to stabilize over the medium term. Inflation remains above the government's target range, and the BSP will be vigilant in monitoring supply side pressures moving forward. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
