KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk: The fund invests in a medium term portfolio of domestic government and corporate securities, exposing investors to the risk of loss arising from a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Credit/ Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt securities issued by related parties, as well as the execution of trade transactions with related counterparties.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

OUTLOOK AND STRATEGY

Market Review. The BPI Government Bond Index returned 3.51% in January, with benchmark government yields falling 70 basis points (bps) on average. Average daily trading volume rose to PHP17.55 billion from December's PHP9.65 billion with trades mostly seen on the belly of the curve.

The Bureau of the Treasury (BTr) held four FXTN auctions in January. The first reissuance of the year, 7-year FXTN 7-68 was fully awarded at an average yield of 6.796%. The 13-year FXTN 25-8 was fully awarded at an average yield of 7.182% with a high bid-to-cover ratio of 5.29x. Yields in the belly and long end of the curve dropped following the strong auction participation. Consequently, the reissuances of the 20-year FXTN 20-25 and 10-year FXTN 10-69 were fully awarded at average yields of 6.525% and 5.913%, respectively. Towards the end of the month, the BTr released the February auction schedule with four Treasury Bill auctions and four FXTN issuances (13-, 5-, 3- and 10-year tenors).

Local inflation for the month of December rose by 8.1% year-on-year, higher than last month's 8.0%. This marked the highest year-on-year change since 2008, as food and fuel prices were affected by supply-side pressures and elevated holiday spending. The local economy expanded by 7.2% in the fourth quarter of 2022, boosted by consumption despite the highest inflation rate in 14 years. For the full year of 2022, GDP expanded by 7.6%. Central bank officials continued to reiterate that they remained prepared to adjust policy settings as needed, given persistently high CPI levels, as well as central bank tightening measures globally.

Fund Performance. The Fund returned 1.95% for the month, above its benchmark by 14 basis points.

Fund Strategy. The Fund looks to gradually add to its duration position as interest rates are expected to stabilize in the near term. Inflation remains above the government's target range, and the BSP will be vigilant in monitoring supply side pressures moving forward. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
