KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk: The fund invests in a medium-term portfolio of domestic government and corporate securities, exposing investors to the risk of loss arising from a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Credit/ Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt securities issued by related parties, as well as the execution of trade transactions with related counterparties.

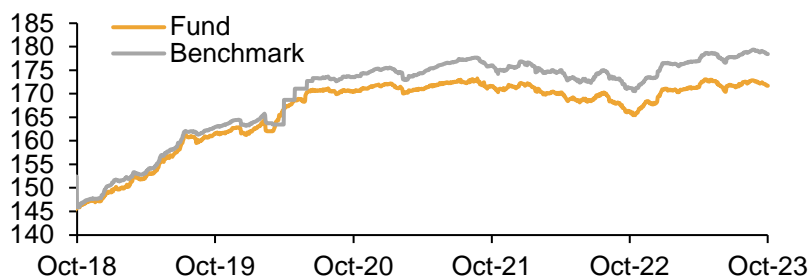

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

OUTLOOK AND STRATEGY

Market Review. The BPI Government Bond Index returned -1.33% in October as the local yield curve bear steepened, rising 45 basis points (bps) on average. Average daily trading volume for the month amounted to PHP10.15 billion lower than September's PHP18.22 billion with trades mostly seen on the short-end of the curve.

The Bureau of the Treasury (BTr) held only three FXTN auctions in October. The 5-year FXTN 10-64, 7-year FXTN 7-70, and 10-year FXTN 10-71 re-issuances were fully awarded at average yields of 6.512%, 6.675%, and 6.954%, respectively. Towards the end of the month, the BTr released the November auction schedule with five Treasury Bill auctions and five FXTN issuances (5-, 7-, 10-, 15-, and 6-year tenors) with an offer size of PHP30 billion each.

In the local space, September headline inflation rose by 6.1% year-on-year, exceeding market expectations of 5.7%. Coming from last month's 5.3%, inflation continued to accelerate as food and energy prices jumped with rice prices surging 17.9% year-on-year. Consequently, the Bangko Sentral ng Pilipinas (BSP) delivered an off-cycle rate hike, raising its key policy rate by 25 basis points in an effort to subdue the persistent price pressures. The BSP's FY2024 inflation forecast was raised to 4.7% from the previous 4.3%. With regard to the upcoming November Monetary Board meeting, the central bank noted that it would remain data dependent in considering the future path of policy rates.

Fund Performance. The Fund returned -0.53% for the month, below its benchmark by 13 basis points.

Fund Strategy. The Fund looks to maintain its current duration position as interest rates are expected to stabilize over the medium term. Though inflation has exceeded the government's target range, the BSP remains vigilant in monitoring supply side pressures and potential second-round effects. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
