KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk: The fund invests in a long term portfolio of US Dollar denominated Philippine sovereign and corporate securities, exposing investors to the risk of loss arising from a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic and global political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt securities issued by related parties, as well as the execution of trade transactions with related counterparties.

Credit/Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic and global political and economic conditions.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

OUTLOOK AND STRATEGY

Market Review. The JP Morgan Asia Credit Index (JACI) Philippines declined by 1.17% in May as Philippine dollar-denominated bonds tracked US Treasuries.

Global bond movements were mixed in May amid mostly strong economic data releases and a US headline inflation figure that showed price pressures easing further. US CPI printed at 4.9% YoY in April, lower than the market estimate and the previous month's 5.0% figure. However, volatility in the fixed income space persisted after former Fed Chair Janet Yellen warned that the government would run out of money to pay its obligations by as early as June 1. US officials convened over the course of the month with hopes to come to an agreement with regard to the impending debt ceiling crisis. For the period, the 10-year US Treasury yield rose by 22 basis points lower to close the month at 3.64%.

In the local economic space, inflation for the month of April settled at 6.6% year-on-year, lower than the 7.6% in March. The figure was once again lower than market expectations, and was brought about by receding supply-side pressures. Consequently, the BSP refrained from hiking interest rates during its Monetary Board meeting mid-month, citing the improvement in local prices. Nevertheless, policy officials reiterated that they remained prepared to adjust policy settings as needed, and added that easing inflation would give them more flexibility moving forward.

Fund Performance. The Fund returned 0.43% for the month, outperforming its benchmark by 160 basis points. Year to date, the fund returned 4.84%, above the benchmark by 164 basis point.

Fund Strategy. The Fund looks to gradually increase its duration position as yields are seen to peak in the near term. Global events remain likely to add volatility. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium
