OUTLOOK AND STRATEGY

Market Review. The JP Morgan Asia Credit Index (JACI) Philippines rose by 8.98% in 2023 as Philippine dollar-denominated bonds tracked movements in US Treasuries.

Global bonds rallied once more after the US Federal Reserve (the Fed) concluded its Monetary Policy meeting for the month on a more dovish tone than expected. In line with market expectations, the Fed kept policy rates steady at 5.25%-5.50%, the third straight meeting it chose to do so. However, the Fed likewise signaled that it would potentially cut rates three times in 2024, based on projections released post-meeting. Policy officials nonetheless remained committed to the fight against inflation, which “has eased over the past year but remains elevated.”

US consumer inflation rose by 3.1% year-on-year for the month of November, in line with the consensus estimate and lower the previous month’s 3.2%. Easing price pressures could be supportive of monetary policy easing down the line. Meanwhile, US GDP grew faster than expected for the third quarter of 2023, rising 5.2% YoY, the fastest pace in almost two years. Fed Chair Powell noted that there was currently little basis for a recession, though economic prospects for 2024 remained in question. Consequently, the 10-year US Treasury benchmark yield fell to as low as 3.85% for the month before ending 2023 just one basis point higher than end-2022 at 3.88%.

In the local space, inflation for the month of November fell to 4.1% YoY from the 4.9% print in October. The figure was well below market expectations (consensus estimate: +4.3% YoY) and was brought about by declining food and fuel prices. With easing inflation and mostly dovish rhetoric from global central banks, the BSP announced that it would hold policy rates steady during its last Monetary Policy Board meeting for the year. BSP Governor Eli Remolona nonetheless noted that the central bank would remain vigilant of its inflation target and would be ready to adjust policy rates as necessary.

Fund Performance. The Fund returned 4.32% for the month, outperforming its benchmark by 32 bps. Year-to-date, the fund returned 7.78%, below the benchmark by 119 bps.

Fund Strategy. The Fund looks to gradually increase its duration position as yields are seen to peak in the near term. Global events remain likely to add volatility. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
