KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Equity Price Risk:

The Fund invests in a concentrated portfolio of stocks listed in the Philippine Stock Exchange, exposing investors to potentially larger losses from a decline in stock prices, compared to funds tracking the index or employing a value style bias/ strategy. Decline in stock prices may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.

Liquidity Risk:

Investors are exposed to the risk of loss due to the Fund's inability to convert equity holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Related Party Risk:

Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.

The Fund's investment outlets undergo proper screening and evaluation in accordance with the Trustee's accreditation process and minimum regulatory requirements. Regulatory exposure limits and asset allocation ranges as provided in the Fund's Plan Rules are strictly adhered to and monitored on a regular basis. OUTLOOK AND STRATEGY

Market Review. The local equities market recovered anew in November after a weak October showing where the index fell below the 6,000-mark. The rally emanated from growing expectations that interest rates may have already peaked following a seemingly improved economic environment. Reports on higher-than-expected 3rd quarter GDP at 5.9%, cooling inflation from both local and the US, Philippine peso strength and central banks' (US Fed and BSP) decision to hold key policy rates propelled sentiment. Moreover, investors digested reports on 3rd quarter earnings results from Philippine companies which showed positive results, albeit at a slower pace which reflects the impact of higher inflation. The Philippine Stock Exchange Index (PSEi) rose 4.18% to 6,223.73 in November.

Trading activity continued to be uninspiring with the average daily turnover slowing down further by -12.3% to US\$71 million for the month. In terms of foreign flows, foreigners finally turned "net buyers", after consecutive months of selling, and were also 53% of active participants. Net foreign inflow was recorded at US\$18 million for November.

In terms of stock performance, the top three gainers for the month include: ALI (+12.03%), JFC (+10.54%) and AC (+9.66%). Meanwhile, the bottom three performers were: ACEN (-9.43%), AGI (-7.55%) and NIKL (-7.34%).

Fund Performance. The fund returned 4.46% in November, outperforming the benchmark by 28 bps. Year-to-date, it outperformed the benchmark by 288 basis points with a return of -2.34%.

Fund Strategy. The Fund will remain defensive amidst the volatility and thin liquidity in the stock market. Elevated interest rates, sticky global inflation, and resilient US dollar will likely continue capping risk assets. The fund will be nimble in maximizing market swings to rebalance in favor of high-quality names.
