Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.

OUTLOOK AND STRATEGY

Market Review. The Philippine Stock Exchange Index (PSEi) sank below the 6,000 mark as a slew of unfavourable macro-economic developments kept investors on the edge. On the global front, weakness in US indices and global equities was evident as an effect of rising yields where 10-year US Treasury yields climbed over 5% for the first time since 2007. Moreover, the US Federal Reserve (Fed) maintained their hawkish stance as they opted to keep interest rates elevated to fight sticky inflation. The on-going geopolitical tensions between Israel and Hamas added to concerns with its potential escalation to other nations in the Middle East. This pose further risk to global oil prices. On the local economic front, the Bangko Sentral ng Pilipinas (BSP) decided to hike its policy rate by 25 basis points to 6.5% in an off-cycle meeting to counter supply-side pressures in CPI inflation. The PSEi dipped 5.5% month-on-month in October to close at 5,973.78.

Trading activity in October subsided after strong activity seen in index-rebalancing events in September. Average daily turnover registered at US\$81 million or 37.8% lower month-on-month. Meanwhile, foreigners continued to be net sellers with US\$171 million worth of outflows.

In terms of stock performance, the top three gainers for the month included: ACEN (+7.94%), TEL (+2.89%) and EMI (+0.24%). Meanwhile, the bottom three performers were: SCC (-16.91%), AGI (-13.96%) and CNVRG (-12.81%).

Fund Performance. The fund returned -5.19% in September, outperforming the benchmark by 31 bps. Year-to-date, it outperformed the benchmark by 251 basis points with a return of -6.51%.

Fund Strategy. The Fund will remain defensive amidst the volatility in the stock market. Elevated interest rates, sticky global inflation and strong US dollar to continue to dampen demand for risk assets. The fund will be nimble and take advantage of market swings to rebalance in favor of high-quality names.
