**Equity Price Risk:** The Fund invests in a concentrated portfolio of stocks listed in the Philippine Stock Exchange, exposing investors to potentially larger losses from a decline in stock prices, compared to funds tracking the index or employing a value style bias/ strategy. **Liquidity Risk:** Investors are exposed to the risk of loss due to the Fund's inability to convert equity holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

**Related Party Risk:** Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.

The Fund's investment outlets undergo proper screening and evaluation in accordance with the Trustee's accreditation process and minimum regulatory requirements. ## OUTLOOK AND STRATEGY

**Market Review.** The Philippine Stock Exchange Index (PSEi) declined in February, reversing most gains in January. Risk-off sentiment prevailed after January inflation from both US (+6.4%) and Philippines (+8.7%) came out higher-than-expected which may signal a prolonged high interest-rate environment. Meanwhile, liquidity events such as PSEi and MSCI rebalancing took effect this month, increasing trading activity. The local bourse dropped 3.5% to close at 6,556.20.

In terms of trading activity, the PSE was more active in February with average daily value turnover at USD146.4 mil or 1% higher than USD144.9 million recorded in the prior month. Meanwhile, foreigners became "Net Sellers" for the month worth US\$142 million. Foreign participation came in at 48%.

For the individual stock performances, the top index gainers for the month included: SMC (+15.12%), MER (+13.26%) and BPI (+4.57%). Meanwhile, the bottom index performers were as follows: GLO (-12.13%), AC (-11.60%) and ACEN (-9.43%).

**Fund Performance.** The Fund registered a loss of 3.77% in February, underperforming its benchmark by 28 bps. Meanwhile, the YTD performance of the Fund reported a loss of 0.74%, underperforming its benchmark by 58 bps.

**Fund Strategy.** The Fund will remain defensive as volatility is expected to persist across financial markets on the back of elevated global inflation. This high inflationary environment could influence Central Banks to maintain interest rates higher for longer until it can contain consumer prices to manageable levels. However, we will take advantage of the volatility in buying quality names on dips and sell on excessive market rallies.
