KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Equity Price Risk: The Fund invests in a concentrated portfolio of stocks listed in the Philippine Stock Exchange, exposing investors to potentially larger losses from a decline in stock prices, compared to funds tracking the index or employing a value style bias/ strategy. Decline in stock prices may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the Fund's inability to convert equity holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.

The Fund's investment outlets undergo proper screening and evaluation in accordance with the Trustee's accreditation process and minimum regulatory requirements. Regulatory exposure limits and asset allocation ranges as provided in the Fund's Plan Rules are strictly adhered to and monitored on a regular basis. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

Market Review. The Philippine Stock Exchange Index (PSEi) finished below the 6,500 level again on muted volumes as worries over the elevated interest rate environment persisted. The US Federal Reserve (The Fed) kept benchmark rates steady in the latest FOMC meeting but still gave a hawkish stance by hinting of potentially two more rate hikes this year. Meanwhile on the local front, the Bangko Sentral ng Pilipinas (BSP) also maintained interest rates with retiring BSP Governor Medalla stating that the central bank will only cut rates should inflation fall within the BSP target band of 2% to 4%. The PSEi dropped 0.14% to 6,468.17 in June.

We saw lackluster trading for the month of June with Average Daily Turnover only at Php4.27 billion or 15% lower month-on-month. Meanwhile, foreigners turned “Net Buyers” at US\$97 million, mostly flowing through banks, particularly BPI and BDO. However, foreign participation fell to 38% compared to 53% in the previous period.

As for individual stock performances, the top three index gainers for the month were: MPI (+9.66%), PLDT (+9.33%) and BPI (+8.85%). Meanwhile, the bottom three index performers included: WLCON (-14.96%), ACEN (-8.02%) and ALI (-7.60%).

Fund Performance. The Fund registered a loss of -0.09% in June, outperforming its benchmark by 5 bps. Meanwhile, the YTD performance of the Fund reported a loss of -0.39%, outperforming its benchmark by 111 bps.

Fund Strategy. The Fund will continue to be defensive as volatility keeps hampering investor sentiment. Elevated interest rates and sticky inflation coupled with slump in major economies are major risk factors. However, we will take advantage of the volatility in buying quality names on dips and sell on excessive market rallies.
