KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Equity Price Risk: The Fund invests in a concentrated portfolio of stocks listed in the Philippine Stock Exchange, exposing investors to potentially larger losses from a decline in stock prices, compared to funds tracking the index or employing a value style bias/ strategy. Decline in stock prices may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the Fund's inability to convert equity holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.

The Fund's investment outlets undergo proper screening and evaluation in accordance with the Trustee's accreditation process and minimum regulatory requirements. Regulatory exposure limits and asset allocation ranges as provided in the Fund's Plan Rules are strictly adhered to and monitored on a regular basis. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

OUTLOOK AND STRATEGY

Market Review. The Philippine Stock Exchange Index (PSEi) displayed a roller coaster performance for the month following a slew of market moving events globally. The PSEi initially rose to as much as 2.4% before the news on Silicon Valley Bank (SVB) and Credit Suisse's collapse which sent shockwaves through the global financial system. The market also priced in the direction of the elevated interest rates and inflation.

Meanwhile, on the local economic front, the Bangko Sentral ng Pilipinas (BSP) raised policy rates by 25 basis points to 6.25% as Philippine Inflation remained high at 8.6%. In terms of inflation forecast, the BSP adjusted the 2023 and 2024 to 6.0% (from 6.1%) and 2.9% (from 3.1%), respectively.

The local bourse gave up 0.9% to close at 6,499.68 in March.

In terms of average daily turnover, the local bourse was less active for the month at US\$130.9 million or 10.6% lower compared to 146.4 million registered in February. Meanwhile, Foreigners remained net sellers with an outflow of US\$498 million, further stretching the Year-to-date figure to US\$518 million. Foreign participation clocked in at 47% (from 48%).

For the individual stock performances, the top three index gainers for the month are as follows: TEL (+10.51%), DMC (+8.90%) and SCC (+7.83%). Meanwhile, the bottom three index performers include: CNVRG (-21.28%), MONDE (-18.66%) and AEV (-10.37%)

Fund Performance. The Fund registered a gain of 0.26% in March, outperforming its benchmark by 112 bps. Meanwhile, the YTD performance of the Fund reported a loss of 0.48%, underperforming its benchmark by 54 bps.

Fund Strategy. The Fund will continue to be defensive as volatility is expected to persist across financial markets. High global inflation will likely keep interest rates elevated. We will take advantage of the volatility in buying quality names on dips and sell on excessive market rallies.
