INVESTMENT OBJECTIVE AND STRATEGY

The Fund intends to achieve long term capital growth derived from a diversified portfolio of equity and fixed income securities. The Fund aims to provide absolute returns in excess of the return of the composite benchmark, 90% BPI Philippine Government Bond 1-3 Year Index and 10% Philippine Stock Exchange Index(PSEi), net of tax.

CLIENT SUITABILITY

A client profiling process shall be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

The BPI Bayanihan Balanced Fund is suitable for investors who:

- Are at least classified as moderately aggressive based on their risk profile
- Have an investment horizon of more than five (5) years

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk: Investors are exposed to adverse changes in the prices of domestic fixed income securities due to a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions.

Equity Price Risk: Investors are exposed to adverse changes in the prices of stocks listed in the Philippine Stock Exchange, which may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the fund's inability to convert fixed income and equity security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt and equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.

Credit/ Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

OUTLOOK AND STRATEGY

Market Review. The BPI Government Bond Index returned -0.03% in February as the local yield curve rose 10 basis points (bps) on average. Average daily trading volume for the month amounted to Php16.78 billion, lower than January's Php20.98 billion with trades mostly seen on the short-end and belly of the curve.

The Bureau of the Treasury (BTr) originally announced four FXTN auctions in February. The first FXTN issuance, the 5-year FXTN 05-78, was rejected by the BTr. Had the paper been fully awarded, the average yield of the 5-year paper would have risen to 6.219%. The next two FXTN auctions were also cancelled to give way to the 5-year RTB issuance. The BTr set the 5-year RTB at 6.25% coupon and raised a record Php458 billion, exceeding the initial Php400 billion target. Following the jumbo RTB issuance, the government issued a new 20-year paper, the FXTN 20-26, and set the coupon at 6.25%. Towards the end of the month, the BTr revised the March schedule of Treasury Bonds offering to 7-, 10-, 20- and 6-year.

In the local space, January headline inflation fell further to 2.8% year-on-year from the previous month's 3.9%. Despite the slowing of inflation, rice prices rose further to 23% year-on-year as international rice price benchmarks rose amid supply risks due to El Niño. The Bangko Sentral ng Pilipinas (BSP) held its first monetary policy meeting of the year and kept its key rate unchanged at 6.50%. The policymakers deem it appropriate to keep the policy rate on hold amid the improvement in inflation condition, but they are ready to adjust the policy settings to maintain price stability.

The Philippine Stock Exchange Index (PSEi) sustained its strong performance for the year, rising for another month. The index surged by 4.49% in February to 6,944.71. Foreigners were net buyers through all trading days of the month. Investor optimism is still driven by positive macro-economic data – decline in global yields, lower inflation, and 4th Quarter GDP strength.

Trading activity slowed in February, with average daily turnover at US\$95.3 million or 8.2% lower month-on-month. Meanwhile, foreign buying registered at US\$128.7 million in the same period. A slew of index names saw 52-week highs driven by foreign buying which also propelled the market to the 6,900-level. Foreign participation in the market stood at 50%.

In terms of stock performance, the top three index gainers for the month included: ICT (+18.93%), MONDE (+13.51%) and BPI (+13.11%). Meanwhile, the bottom three performers were: AGI (-8.99%), SMPH (-7.74%) and NIKL (-6.20%).

Fund Performance. The fund returned 0.52% in February, underperforming its benchmark by 9 bps. Year-to-date, the Fund registered a gain of 1.01%, behind the benchmark by 25 bps.

Fund Strategy. The Fund looks to maintain its current duration position as interest rates are expected to stabilize over the medium term. It will likewise continue to hold high quality corporate bonds for yield enhancement. Though inflation has exceeded the government's target range, the BSP remains vigilant in monitoring supply side pressures and potential second-round effects. Volatility will persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.

For equities: The Fund will continue to be defensive, but also opportunistic, as volatility could persist given thin market liquidity and inflation risk is still on the upside. The Fund will focus on companies with leading market capitalization and good fundamentals.
