OUTLOOK AND STRATEGY

Market Review. The BPI Government Bond Index returned 0.51% in March as the local yield curve fell 2 basis points (bps) on average. Average daily trading volume for the month amounted to Php19.73 billion, higher than February's Php16.78 billion with trades mostly seen on the belly of the curve.

The Bureau of the Treasury (BTr) held four FXTN auctions in March. The 7-year FXTN 07-71, 10-year FXTN 10-72, 20-year FXTN 20-26, and 6-year FXTN 07-70 reissuances were all fully awarded at average yields of 6.270%, 6.227%, 6.189% and 6.237%, respectively. Towards the end of the month, the BTr announced the borrowing schedule for the second quarter of 2024, with weekly Treasury Bill auctions and monthly FXTN issuances (7-, 10-, 15- and 20-year tenors) and an additional 3-year issuance in May with an offer size of PHP30 billion each.

In the local space, February headline inflation rose by 3.4% year-on-year from previous month's 2.8%. The four straight months of inflation slowdown ended after rice prices rose 23.7% year-on-year due to tight supply and high world prices. BSP Governor Eli Remolona mentioned that while it's too soon to ease policy rates, it is unlikely to tighten more. The policymakers remain ready to adjust the rate settings to maintain price stability.

The Philippine Stock Exchange Index (PSEi) slightly move down by -0.59% month-on-month closing March at 6,900.53. Sentiment was dampened by inflation data showing to be sticky, resulting in a pushback in the aggressive rate cut narrative. Domestic inflation accelerated after four consecutive months of decline as the Feb '24 headline CPI came in at 3.4% (vs. consensus estimates of 3.0%). Furthermore, corporate earnings results came out underwhelming and the FTSE rebalancing also prompted foreign outflows.

In relation, trading activity improved in March, with average daily turnover at US\$124 million or 30% higher month-on-month (MoM). Albeit foreign selling registered at US\$45 million, a reversal from last month's US\$128 million.

On a per name basis, the top three index gainers for the month were: CNPF (+19.40%), CNVRG (+10.67%) and ICT (+10.03%). On the flip side, the bottom three performers were: WLCON (-17.69%), NIKL (-11.89%) and AEV (-11.60%).

Fund Performance. The fund returned 0.39% in March, in line with the benchmark. Year-to-date, the Fund registered a gain of 1.40%, behind the benchmark by 26 bps.

Fund Strategy. The Fund looks to maintain its current duration position as interest rates are expected to stabilize over the medium term. It will likewise continue to hold high quality corporate bonds for yield enhancement. While inflation has settled within the BSP's target in the past months, upside risks are still present. The BSP remains vigilant in monitoring supply side pressures and potential second-round effects. The central bank signalled that it is waiting for inflation rates to fall comfortably within the 2-4% target before cutting policy rates. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.

For equities: The Fund will continue to be defensive, but also opportunistic, as volatility could persist given thin market liquidity and inflation risk is still on the upside. The Fund will focus on companies with leading market capitalization and good fundamentals.
