KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk: The fund invests in short term domestic fixed income securities, exposing investors to the risk of loss arising from a rise in interest rates, which generally causes fixed income security prices to decline. Factors/events that may lead to a rise in interest rates include adverse market conditions, issuer-specific factors/events and/or negative developments in domestic political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the Fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Credit/Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt securities issued by related parties, as well as the execution of trade transactions with related counterparties.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

OUTLOOK AND STRATEGY

Market Review. The BPI Money Market Index returned 0.34% in February, while benchmark short-term government yields rose by 16 basis points (bps) on average. Average daily trading volume for the month amounted to Php16.78 billion, lower than January's Php20.98 billion with trades mostly seen on the short-end and belly of the curve.

The Bureau of the Treasury (BTr) held four Treasury Bill auctions in February. During the last T-Bill auction of the month, the 91-day, 182-day, and 364-day papers were fully awarded at average yields of 5.710%, 5.971%, and 6.085%, respectively. The average weekly offering of BSP Bills for February fell to Php85 billion and Php46.3 billion for the 28-day and 56-day paper, respectively. Over the course of January, a total of Php482 billion worth of 28- and 56-day BSP Bills were issued at weighted average yields of 6.768% and 6.763%, respectively. Towards the end of the month, the BTr revised the March schedule of Treasury Bonds offering to 7-, 10-, 20- and 6-year.

In the local space, January headline inflation fell further to 2.8% year-on-year from the previous month's 3.9%. Despite the slowing of inflation, rice prices rose further to 23% year-on-year as international rice price benchmarks rose amid supply risks due to El Niño. The Bangko Sentral ng Pilipinas (BSP) held its first monetary policy meeting of the year and kept its key rate unchanged at 6.50%. The policymakers deem it appropriate to keep the policy rate on hold amid the improvement in inflation condition, but they are ready to adjust the policy settings to maintain price stability.

Fund Performance. The Fund returned 0.37% during the month, outperforming the benchmark by 2 basis points.

Fund Strategy. The Fund favors the safety of shorter dated securities and Time Deposits. Expectations of rising rates moving forward may provide an opportunity for better yielding investment outlets
