OUTLOOK AND STRATEGY

Market Review. The Philippine Stock Exchange Index (PSEi) sustained its strong performance for the year, rising for another month. The index surged by 4.49% in February to 6,944.71. Foreigners were net buyers through all trading days of the month. Investor optimism is still driven by positive macro-economic data – decline in global yields, lower inflation, and 4th Quarter GDP strength.

Trading activity slowed in February, with average daily turnover at US\$95.3 million or 8.2% lower month-on-month. Meanwhile, foreign buying registered at US\$128.7 million in the same period. A slew of index names saw 52-week highs driven by foreign buying which also propelled the market to the 6,900-level. Foreign participation in the market stood at 50%.

In terms of stock performance, the top three index gainers for the month included: ICT (+18.93%), MONDE (+13.51%) and BPI (+13.11%). Meanwhile, the bottom three performers were: AGI (-8.99%), SMPH (-7.74%) and NIKL (-6.20%).

Fund Performance. The fund underperformed its benchmark by 37 basis points in February with a return of 4.12%. For 2024, the fund underperformed its benchmark by 22 basis points with a 7.45% return.

Fund Strategy. The Fund will continue to be defensive, but also opportunistic, as volatility could persist given thin market liquidity and inflation risk is still on the upside. The Fund will focus on companies with leading market capitalization and good fundamentals.
