OUTLOOK AND STRATEGY

Market Review. The BPI Government Bond Index returned -0.03% in February as the local yield curve rose 10 basis points (bps) on average. Average daily trading volume for the month amounted to Php16.78 billion, lower than January's Php20.98 billion with trades mostly seen on the short-end and belly of the curve.

The Bureau of the Treasury (BTr) originally announced four FXTN auctions in February. The first FXTN issuance, the 5-year FXTN 05-78, was rejected by the BTr. Had the paper been fully awarded, the average yield of the 5-year paper would have risen to 6.219%. The next two FXTN auctions were also cancelled to give way to the 5-year RTB issuance. The BTr set the 5-year RTB at 6.25% coupon and raised a record Php458 billion, exceeding the initial Php400 billion target. Following the jumbo RTB issuance, the government issued a new 20-year paper, the FXTN 20-26, and set the coupon at 6.25%. Towards the end of the month, the BTr revised the March schedule of Treasury Bonds offering to 7-, 10-, 20- and 6-year.

In the local space, January headline inflation fell further to 2.8% year-on-year from the previous month's 3.9%. Despite the slowing of inflation, rice prices rose further to 23% year-on-year as international rice price benchmarks rose amid supply risks due to El Niño. The Bangko Sentral ng Pilipinas (BSP) held its first monetary policy meeting of the year and kept its key rate unchanged at 6.50%. The policymakers deem it appropriate to keep the policy rate on hold amid the improvement in inflation condition, but they are ready to adjust the policy settings to maintain price stability.

Fund Performance. The Fund rose by 0.14% for the month, 59 basis points below its benchmark.

Fund Strategy. The Fund looks to maintain its current duration position as interest rates are expected to stabilize over the medium term. It will likewise continue to hold high quality corporate bonds for yield enhancement. Though inflation has exceeded the government's target range, the BSP remains vigilant in monitoring supply side pressures and potential second-round effects. Volatility will persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
