<b>Interest Rate Risk:</b>	The fund invests in short term domestic fixed income securities, exposing investors to the risk of loss arising from a rise in interest rates, which generally causes fixed income security prices to decline. <b>Liquidity Risk:</b>	Investors are exposed to the risk of loss due to the Fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.
<b>Credit/ Default Risk:</b>	Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.
<b>Related Party Risk:</b>	Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt securities issued by related parties, as well as the execution of trade transactions with related counterparties.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

## OUTLOOK AND STRATEGY

**Market Review.** The BPI Money Market Index returned 0.38% in June, while short-term government yield movements were flat compared to previous month's level. Average daily trading volume for the month amounted to Php20.86 billion, lower than May's Php23.86 billion with trades mostly seen on the belly of the curve.

The Bureau of the Treasury (BTr) held four Treasury Bill auctions in June. During the last T-Bill auction of the month, the 91-day, 182-day, and 364-day papers were fully awarded at average yields of 5.666%, 5.930%, and 6.031%, respectively. The average weekly offering of BSP Bills for June fell to Php97.5 billion for the 28-day paper and the 56-day paper fell to Php60 billion. Over the course of June, a total of Php596 billion worth of 28- and 56-day BSP Bills were issued at weighted average yields of 6.675% and 6.665%, respectively. The Bureau of Treasury (BTr) announced its borrowing program for the third quarter of 2024, with weekly Treasury bill offers increased to PHP 20 billion. The BTr plans to issue more tenors for the quarter, offering PHP 30 billion each for the 3-, 5-, 7-, and 10- year while the 14- and 20-year Treasury bond offers were reduced to PHP 25 billion.

In the local space, May headline inflation accelerated for the fourth straight month by 3.9% year-on-year from the previous month's 3.8%. The main drivers of inflation included housing, water, electricity, and gas while rice prices saw a deceleration from the previous figure of 23.9% to 23%. In an effort to curb elevated rice prices, the National Economic Development Authority (NEDA) Board approved the new Comprehensive tariff program which reduces tariff rates for rice imports alongside other essential commodities effective until 2028. The Bangko Sentral ng Pilipinas (BSP) held its policy rate steady at 6.5% during their Monetary Board meeting in June. Despite the weakening Peso, BSP Governor Eli Remolona had dovish remarks on the possibility of an August rate cut, which is ahead of the market expectations of the Federal Reserve to begin easing in September. The BSP revised both its 2024 and 2025 inflation forecast to 3.1% from 3.8% and 3.7%, respectively.

**Fund Performance.** The Fund returned 0.35% during the month, 1 basis point above the benchmark.

**Fund Strategy.** The Fund favors the safety of shorter-dated securities and time deposits. Expectations of interest rates staying elevated may help maintain current portfolio yield.
