KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest	Investors are exposed to adverse changes in the prices of domestic fixed income securities due to a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise in interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions..
Equity Price Risk:	Investors are exposed to adverse changes in the prices of stocks listed in the Philippine Stock Exchange, which may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.
Liquidity Risk:	Investors are exposed to the risk of loss due to the fund's inability to convert fixed income and equity security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.
Related Party Risk	Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt and equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.
Credit/ Default Risk	Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

OUTLOOK AND STRATEGY

Market Review. The BPI Government Bond Index fell month-on-month, losing 0.36% in October as Philippine government bond yields increased by an average of 15 basis points (bps). Average daily trading volume for the month reached Php 39.6 billion, down from Php50.2 billion in September, with most trades concentrated in 5 and 10-year securities. The Bureau of the Treasury (BTr) held three FXTN auctions in October, fully awarding the 5-, 7- and 10-year tenors. Auction highs were generally aligned with secondary market bids at the time, with the BTr awarding at 5.508%, 5.690%, and 5.870%, respectively.

On the domestic front, inflation continued its downward trend as it decelerated to 1.9% in September from 3.3% in August, much lower than economists' median estimate of 2.5%. The lower-than-expected inflation was driven by slower food price increases and a decline in transportation costs. Consequently, the Bangko Sentral ng Pilipinas cut rates by 25 basis points during its policy meeting in October, citing easing price pressures. The BSP will continue to vigilantly monitor economic data releases in determining its policy actions moving forward.

Internationally, US inflation decelerated from 2.5% in August to 2.4% in September, in line with market estimates. However, despite evidence of easing inflation, US Treasuries were extremely volatile for the month as investors anticipated the upcoming US elections in early November.

The Philippine Stock Exchange Index (PSEi) cooled in October following three consecutive months of strong performances. At the beginning of the month, the local bourse continued its ascent to north of 7,500 mark backed by the release of lower-than-expected local inflation print in September at 1.9%. Consequently, the Bangko Sentral ng Pilipinas (BSP) reduced policy rates by 25 basis points to 6.0% for the second time in 2024. However, the PSEi failed to overcome the 7,500 to 7,600 resistance level as profit-taking took place. This coincided with weakness on the Philippine Peso which closed to 58.10 or -3.69% month-on-month. Moreover, risk-off stance was adopted by market players as they awaited the result of the US election. The PSEi gave up 1.78% month-on-month to 7,142.96.

The market turnover slowed to Php5 billion or -24% month-on-month in October. Meanwhile, foreigners continued to be net buyers at US\$22 million, which marked the 4th consecutive month of net foreign buying. Top foreign bought stocks were AC (+US\$24.5 million), BPI (+US\$15 million) and GLO (+US\$10.0 million). In terms of participation level, it was an even split between foreigners and locals at 50%.

On a per stock basis, the top three index gainers for the month include: MER (+11.82%), CNPF (+10.38%) and MONDE (+7.07%). Meanwhile, the bottom three performers include: JGS (-12.59%), WLCN (-12.02%) and ALI (-10.66%). Market breadth was skewed to the negative territory with 23 declines versus 7 advances.

Fund Performance. The Fund returned -1.48% in October, underperforming the benchmark by 45 basis points. Year-to-date, the Fund registered a gain of 6.59%, behind the benchmark by 135 basis points.

Fund Strategy. The Fund looks to gradually increase its duration position as interest rates are expected to fall towards year-end. While inflation has settled within the BSP's target in the past months, upside risks are still present. The BSP has already decreased its policy rates by 25 basis points to 6.00%. The central bank remains vigilant in monitoring inflation figures before easing rates further. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.

For equities: The Fund will be defensive as uncertainties from post-US Election results, and volatility from geo-political risks coupled with thin market liquidity remain. The Fund's preference is still for companies with leading market capitalization and good fundamentals as well as dividend paying stocks.
