KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Equity Price Risk: The Fund invests in a concentrated portfolio of stocks listed in the Philippine Stock Exchange, exposing investors to potentially larger losses from a decline in stock prices, compared to funds tracking the index or employing a value style bias/ strategy. Decline in stock prices may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the Fund's inability to convert equity holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.

The Fund's investment outlets undergo proper screening and evaluation in accordance with the Trustee's accreditation process and minimum regulatory requirements. Regulatory exposure limits and asset allocation ranges as provided in the Fund's Plan Rules are strictly adhered to and monitored on a regular basis. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

OUTLOOK AND STRATEGY

Market Review. The Philippine Stock Exchange Index (PSEi) got off to a hot start in 2024. The early-year optimism, fueled by the prospects of potential rate cuts, has propelled risk assets to gain traction. Further bolstering this is the encouraging local macroeconomic data, which has boosted investor sentiment. Notably, December inflation data came in lower at 3.9% from November's 4.1% and below consensus estimates of 4.0%. In addition to that, 4Q2023 Philippine GDP growth was recorded at 5.6%, exceeding market expectations of 5.2%.

Against this backdrop, the PSEi concluded January at 6,646.44, marking a 3.04% month-on-month return.

Trading activity surged, with the average daily turnover registering at US\$104 mil or 16.6% month-on-month. Foreign investors opened the year as net buyers at positive US\$80 million in January with observable preference for big cap liquid names primarily holding firms and banks.

In terms of stock performance, the top three gainers for the month include: BLOOM (+13.62%), GTCAP (+12.80%) and MBT (+11.31%). Meanwhile, the bottom three performers were: NIKL (-11.68%), MER (-9.27%) and URC (-5.67%).

Fund Performance. The fund returned 2.80% in January, underperforming the benchmark by 24 bps.

Fund Strategy. The Fund will continue to be defensive, but also opportunistic, as volatility could persist given thin market liquidity and as interest rates remain elevated. The Fund will focus on companies with leading market capitalization.
