KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Equity Price Risk:	The Fund invests in a concentrated portfolio of stocks listed in the Philippine Stock Exchange, exposing investors to potentially larger losses from a decline in stock prices, compared to funds tracking the index or employing a value style bias/ strategy. Decline in stock prices may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.
Liquidity Risk:	Investors are exposed to the risk of loss due to the Fund's inability to convert equity holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.
Related Party Risk:	Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.

The Fund's investment outlets undergo proper screening and evaluation in accordance with the Trustee's accreditation process and minimum regulatory requirements. Regulatory exposure limits and asset allocation ranges as provided in the Fund's Plan Rules are strictly adhered to and monitored on a regular basis. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

OUTLOOK AND STRATEGY

Market Review. The Philippine Stock Exchange Index (PSEi) fell in November amid large foreign selling following the outcome of the US Presidential Elections. The Donald Trump 2.0 is perceived to strengthen the U.S Dollar which negatively affect emerging markets. The Philippine Peso depreciated to Php59 level during the month. Moreover, the local 3Q 2024 GDP failed to improve market sentiment as it came out at 5.2%, lower than 5.7% consensus estimate.

The Average Daily Turnover improved to Php5.275 billion or 5.5% higher month-on-month in November. Meanwhile, in terms of foreign activity, foreigners adopted a risk-off stance which bucked the trend of 4 consecutive months net foreign buying. Foreigners sold off US\$349 million for the month which brought their year-to-date flows to US\$305 million net outflow. Their top sold stocks were ICT (-US\$ 71.8 million), ALI (-US\$ 62 million) and BPI (-US\$ 33.8 million). Foreign participation improved to 52%.

On a per stock basis, the top three index gainers for the month include: CNVRG (+1.86%), BDO (+1.11%) and MBT (+0.33%). Meanwhile, the bottom three performers include: BLOOM (-28.83%), ACEN (-19.92%) and WLCON (-19.25%).

Fund Performance. The Fund registered a loss of -7.34% in November, underperforming its benchmark by 7 bps. Meanwhile, the YTD performance of the Fund reported a gain of 1.99%, underperforming its benchmark by 55 bps.

Fund Strategy. The Fund will accumulate on market dips as volatility from the upcoming Trump 2.0, geopolitical risks coupled with thin market liquidity continue to persist. The Fund's preference is for companies with leading market capitalization and good fundamentals as well as defensive and high-yielding stocks.
