BENCHMARK INFORMATION

Name: The PSEi Total Return Index (PSEi TRI)

Date of Change: January 2, 2025

Description and Reason for Change: The Philippine Stock Exchange Index or PSEi is the main index of the Philippine Stock Exchange. The PSEi is a free float-adjusted market capitalization-weighted index of the 30 largest and most active common stock. The PSEi Total Return Index (PSEi TRI) covers both price performance and income from dividend payments by reinvesting cash dividends back to the PSEi according to each constituent's respective market capitalization weightings. The change in the fund's benchmark from PSEi to PSEi TRI is mainly to satisfy the characteristics of a valid benchmark for a UITF in the BSP Circular No. 1178, and to conform with the Global Investment Performance Standards (GIPS) requirement for firms to select an appropriate total return benchmark when available.

Information about the benchmark may be accessed through Philippine Stock Exchange <https://www.pse.com.ph/>. Alternatively, participants may request information from BPI Wealth at bpiwealth.com.ph.

OUTLOOK AND STRATEGY

Market Review. Domestic fixed income investments performed well in January 2025, with the BPI GS Overall Index up 0.57%. This was due to steady income from bonds and falling yields, as people expect the Bangko Sentral ng Pilipinas (BSP) to cut rates in February after the Philippine economy grew slower than expected in the last quarter of 2024. The economy grew by 5.2%, which was below expectations, partly due to multiple typhoons. Inflation rose to 2.9% in December, driven by higher vegetable prices, utility costs, and transport expenses. The BSP is expected to cut the policy rates by a total of 0.5% (50 basis points) in 2025.

The Philippine Stock Exchange Index (PSEi) took a dive to start a year amidst a lackluster month. Investors erred on the side of caution on persisting concerns over the Trump 2.0 presidency and less favorable domestic economic data. Trading activity accelerated in the latter part of the month following the PSE semi-annual index review or PSE rebalancing where China Banking Corp (CBC) and AREIT Inc (AREIT) got included in the 30 names basket, replacing Wilcon Depot Inc (WILCON) and Nickel Asia Corp (NIKL). The PSEi began 2025 by falling 10.20% month-on-month to 5,862.59

Trading activity, as measured by the Average Daily Turnover, improved by 1.11% to Php4.88 billion in January. This was mainly lifted by the PSE rebalancing in the last trading day of the month. Prior to the day, the Average Daily Turnover only recorded at Php4.10 billion. In terms of foreign activity, foreigners were net sellers with US\$113 million outflow. Top foreign sold stocks were ALI (-US\$21.2 million), MBT (-US\$20.6 million), and BDO (-US\$19.5 million). Foreign participation in January was at 49%.

On a per stock basis, the top three index gainers for the month include: CBC (+46.46%), AREIT (+10.67%) and TEL (+3.47%). Meanwhile, the bottom three performers include: WILCON (-41.26%), NIKL (-37.82%) and AGI (-33.33%).

Fund Performance. The fund returned -3.65% in January, outperforming the benchmark by 113 basis points. Year-to-date, the Fund registered a loss of -3.65%, above the benchmark by 113 basis points.

Fund Strategy. The Fund will accumulate on market dips as volatility from the upcoming Trump 2.0, geopolitical risks coupled with thin market liquidity continue to persist. The Fund's preference is for companies with leading market capitalization and good fundamentals as well as defensive and high-yielding stocks.

For the fixed income portion of the fund, the Fund looks to maintain its position in long-term bonds as interest rates are expected to continue to decline in 2025. Investors in a balanced fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
