**KEY RISKS AND RISK MANAGEMENT**

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

**Interest Rate Risk:** Investors are exposed to adverse changes in the prices of domestic fixed income securities due to a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions.

**Equity Price Risk:** Investors are exposed to adverse changes in the prices of stocks listed in the Philippine Stock Exchange, which may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.

**Liquidity Risk:** Investors are exposed to the risk of loss due to the fund's inability to convert fixed income and equity security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

**Related Party Risk:** Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt and equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.

**Credit/ Default Risk:** Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks

## BENCHMARK INFORMATION

**Name:** The PSEi Total Return Index (PSEi TRI)

**Date of Change:** January 2, 2025

**Description and Reason for Change:** The Philippine Stock Exchange Index or PSEi is the main index of the Philippine Stock Exchange. The PSEi is a free float-adjusted market capitalization-weighted index of the 30 largest and most active common stock. The PSEi Total Return Index (PSEi TRI) covers both price performance and income from dividend payments by reinvesting cash dividends back to the PSEi according to each constituent's respective market capitalization weightings. The change in the fund's benchmark from PSEi to PSEi TRI is mainly to satisfy the characteristics of a valid benchmark for a UITF in the BSP Circular No. 1178, and to conform with the Global Investment Performance Standards (GIPS) requirement for firms to select an appropriate total return benchmark when available.

*Information about the benchmark may be accessed through Philippine Stock Exchange <https://www.pse.com.ph/>. Alternatively, participants may request information from BPI Wealth at [bpiwealth.com.ph](mailto:bpiwealth.com.ph).*

## OUTLOOK AND STRATEGY

**Market Review.** May 2025 saw a stable demand for Philippine local fixed income bonds. There was a steepening of the yield curve characterized by a quicker decline in the yields for the 1-5 year papers while the long-end remained high. As such, the BPI Philippine Government Bond Index returned 0.298% month-on-month, while the BPI Philippine Government Bond 1-5 Year Index returned higher at 0.457%.

Demand for the short-end Tbill and the 1-5 year can be attributed to the declining CPI where actual print for the month of April, released in May, came out at 1.4% -- lower than market expectations of 1.8%. This fueled the positive expectations that the Bangko Sentral ng Pilipinas (BSP) has room to cut policy rates at the next meeting in June with Governor Remolona stating two rate cuts are still on the table for the year. The long-end of the curve remained elevated as The Bureau of Treasury (BTr) chose to award the target issuance size of 25B fully for the 20-year FXTN auction last May 15. The highest awarded bid was at 6.618%.

We continue to expect demand for local government securities to remain strong especially for the short to medium-term bonds. The BSP's current benchmark rate is at 5.5%. The market is currently pricing in a rate cut at the upcoming June 19 meeting as the BSP projected inflation to settle within the 0.9% to 1.7% in May -- as significant decline compared to the inflation print the same time last year. Rate cuts will also be supportive of local growth amidst fear of growth slowdown caused by uncertainties in US tariff policy.

The Philippine Stock Exchange Index (PSEi) snapped its three-month winning streak as the index slipped by 0.2% to 6,341.53. The local bourse surged early on as global developments particularly on the ever-pressing US Tariff issues continued to move markets. US and China struck a temporary trade deal that covered a 90-day pause on tariffs and a decline in reciprocal tariffs by 115 percentage points. Moreover, US President Donald Trump postponed the 50% tariffs implementation on European Union imports. On the local scene, sentiment was supported by the strong Philippine peso after trading below the Php56 level. However, gains were capped at the latter part of the month on the back of slower-than-expected 1Q GDP for the Philippines at 5.4% compared to median estimate of 5.8%. The index was dragged even further following the MSCI rebalancing at month-end.

On trading activity, the PSEi recorded an Average Daily Turnover of Php6.35 billion or 9% higher on a month-on-month basis. In terms of foreign activity, foreigners remained net sellers at US\$259 million dragged by a US\$283 million block sale of RRHI shares. Excluding the transaction, foreigners would have been net buyers. On a per stock basis, the top three index gainers for the month include: AGI (+36.27%), BLOOM (+22.58%) and ICT (+20.52%). Meanwhile, the bottom three performers were: CBC (-16.92%), GLO (-8.81%) and ALI (-8.18%).

**Fund Performance.** The fund returned 0.19% in May, lower than the benchmark by 22 basis points. Year-to-date, the Fund registered a gain of 1.83%, above the benchmark by 77 basis points.

**Fund Strategy.** The Fund will be opportunistic on market dips as volatility from the global front remains given lingering uncertainties on US tariffs and escalating geopolitical tensions. The preference is for companies with leading market capitalization, good fundamentals and are high-dividend paying. For the fixed income portion of the fund, the Fund looks to maintain its position in long-term bonds as interest rates are expected to continue to decline in 2025. Investors in a balanced fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
