OUTLOOK AND STRATEGY

Market Review. In November, local bond yields saw a month-on-month decline of 9.27 bps across the curve. Short-term yields (1 year and below) declined by an average of -3.48 basis points. The decline was most notable in the intermediate part of the curve as investors look to lengthen duration. The two and three-year declined the most by 18bps and 17 bps, respectively followed by the five-year with a 14 bps decline. The long-end also declined to the tune of 4 bps with growth prospects at risk. The BPI Money Market Index went up by 0.38%, BPI 1-5 Index up by 0.69%, and the BPI GS Overall Index up by 0.73%. October inflation came out at 1.7%, still below the government's 2 to 4 percent target range for the year. 3Q 2025 GDP also came out anemic at a print of 4%, lower than the 2Q print of 5.5%. The BSP surprised the market with a rate cut on October, moving ahead of potential economic slowdown amidst governance concern that dampened business sentiment. The dovish tone caused markets to price in further rate cuts going into December and 2026. Rates now stand at 4.75% after the cut. Market is expecting policy rate may reach 4% in 2026. The Philippine Stock Exchange Index (PSEi) had a choppy month in November before ultimately settling higher. The local bourse almost fell to a cliff, reaching sub-5,600, following a slew of weak domestic economic data such as dismal 3Q GDP, uninspiring 3Q corporate earnings coupled with heightened political issues. Concerns over Federal Reserve Policy Rates due to prolonged US Government Shutdown likewise dragged investor sentiment. However, the market was lifted by local bargain-hunting towards the latter part of the month. The PSEi rose by 1.56% month-on-month to close at 6,022.24. Trading activity surged in November with Average Daily Turnover registering at Php6.22 billion from Php5.00 billion following some key corporate action events such as the Maynilad (MYNLD) IPO and AREIT Secondary Share Placement. On foreign activity, foreigners turned "Net Buyers" at US\$78 million. On a per stock basis, the top three index gainers for the month include: CNVRG (+22.26%), SMC (+21.77%) and PLUS (+16.95%). Meanwhile, the bottom three performers were: URC (-13.70%), JFC (-12.74%) and SCC (-11.95%).

Fund Performance. The fund returned 1.20% in November, lower than the benchmark by 8 basis points. Year-to-date, the Fund registered a gain of 1.38%, outperforming the benchmark by 66 basis points.

Fund Strategy. The Fund will remain defensive amidst volatility continues from uncertainties on Fed Rate Direction, Trump tariffs, geopolitics, and heightened local political risks. The Fund's preference is for companies with leading market capitalization, good fundamentals, dividend-paying and high-yielding. For the fixed income portion of the fund, the Fund looks to maintain its position in long-term bonds as interest rates are expected to continue to decline in 2025. Investors in a balanced fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
