## OUTLOOK AND STRATEGY

**Market Review.** In June, the Philippine bond market saw significant ups and downs. This was mainly because of a brief conflict between Israel and Iran, which caused oil prices to jump and raised concerns about inflation. The 10-year Philippine bond yield rose by as much as 16 basis points before ending the month two basis points higher. As such, the BPI Philippine Government Bond Index returned 0.28%, bringing the first half of 2025 return to 2.47%. Meanwhile, the BPI Philippine Government Bond 1-5 Year Index returned 0.35%, with first half 2025 return at 3.04%.

Aside from the Israel-Iran war, investors also weighed local and global macroeconomic developments. Philippine inflation further fell to 1.3% in May, from 1.4% in April. In addition, the Bangko Sentral ng Pilipinas cut the policy rate by 25 basis points to 5.25%. In the US, the Federal Reserve kept rates steady at 4.25%-4.50%, as policymakers await more data to better assess the impact of US import tariffs on the economy.

Looking ahead, we expect market volatility to continue due to global uncertainties, especially around US trade policies and geopolitical tensions. However, the local environment remains favorable for bond investments, thanks to low inflation, slower economic growth, dovish central bank, and fewer government bond auctions. Towards the end of June, the Bureau of the Treasury released its auction schedule for the third quarter, which showed an 11% decline in offering volume versus the initial schedule in the second quarter.

**Fund Performance.** The Fund continued to track the returns and duration of the iBoxx ABF Philippines. The Fund returned 0.27% for the month, closely tracking the benchmark index.

**Fund Strategy.** The iBoxx index will see minimal changes for the month. The Fund will rebalance to reflect any changes to continue to closely track the duration of its benchmark.
