## OUTLOOK AND STRATEGY

**Market Review.** May 2025 saw a stable demand for Philippine local fixed income bonds. There was a steepening of the yield curve characterized by a quicker decline in the yields for the 1-5 year papers while the long-end remained high. As such, the BPI Philippine Government Bond Index returned 0.298% month-on-month, while the BPI Philippine Government Bond 1-5 Year Index returned higher at 0.457%. Demand for the short-end Tbill and the 1-5 year can be attributed to the declining CPI where actual print for the month of April, released in May, came out at 1.4% -- lower than market expectations of 1.8%. This fuelled the positive expectations that the Bangko Sentral ng Pilipinas (BSP) has room to cut policy rates at the next meeting in June with Governor Remolona stating two rate cuts are still on the table for the year. The long-end of the curve remained elevated as The Bureau of Treasury (BTr) chose to award the target issuance size of 25B fully for the 20-year FXTN auction last May 15. The highest awarded bid was at 6.618%. We continue to expect demand for local government securities to remain strong especially for the short to medium-term bonds. The BSP's current benchmark rate is at 5.5%. The market is currently pricing in a rate cut at the upcoming June 19 meeting as the BSP projected inflation to settle within the 0.9% to 1.7% in May – as significant decline compared to the inflation print the same time last year. Rate cuts will also be supportive of local growth amidst fear of growth slowdown caused by uncertainties in US tariff policy.

**Fund Performance.** The Fund continued to track the returns and duration of the iBoxx ABF Philippines. The Fund returned 0.23% for the month, closely tracking the benchmark index.

**Fund Strategy.** The iBoxx index will see minimal changes for the month. The Fund will rebalance to reflect any changes to continue to closely track the duration of its benchmark.
