KEY RISKS AND RISK MANAGEMENT

Interest Rate Risk: The fund invests in domestic government- issued/ guaranteed securities comprising the iBoxx ABF Philippines Index, exposing investors to the risk of loss arising from a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, and/ or negative developments in domestic political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the Fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, the execution of trade transactions with related counterparties.

Down-grade Risk: Investors are exposed to the risk of loss arising from adverse changes in the prices of domestic government-issued/ guaranteed securities due to a downgrade in the credit rating of the Philippines.

Index Tracking Risk: Investors are exposed to the risk of not being able to achieve a level of return that matches the index being tracked by the fund due primarily to operating and fund management expenses.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

⁵ BENCHMARK INFORMATION

Name: iBoxx ABF Philippines Index

Description and Key Characteristics: The iBoxx Asia Bond Fund Index family (iBoxx ABF) is designed to reflect the performance of local currency denominated sovereign and sub sovereign debt from 8 Asian countries/territories. The index offers a broad coverage of the sovereign and sub-sovereign bond universe of China, Hong Kong, Indonesia, Korea, Malaysia, Philippines, Singapore and Thailand, whilst upholding minimum standards of investability and liquidity. The indices are an integral part of the global iBoxx index families, which provide the marketplace with accurate and objective benchmarks by which to assess the performance of bond markets and investments. The iBoxx ABF Index family is split into three major indices: Overall, Sovereigns, and Sub-sovereigns. These are further broken down into sub-indices based on markets and maturities. All iBoxx indices are priced based on multiple data inputs.

Information about the benchmark may be accessed through www.ihsmarket.com. Alternatively, participants may request information from BPI Wealth at bpiwealth@bpi.com.ph.

OUTLOOK AND STRATEGY

Market Review. In September, local government bond yields moved in mixed directions. Short-term yields (1 year and below) declined by an average of 28 basis points, reflecting the market's response to easing inflation and monetary policy. On the other hand, longer-term yields (1 to 25 years) saw a slight increase, averaging a 1.6 basis point rise. Despite these movements, returns remained positive, with the BPI Government Bond Index gaining 0.27% and the BPI Money Market Index up 0.44% for the month. The Bureau of the Treasury (BTr) continued its regular weekly auctions of Fixed Rate Treasury Notes (FXTNs), offering various tenors from 3 to 20 years. Most of the bonds, specifically the 3-, 5-, 7-, and 10-year FXTNs, were fully awarded at competitive yields ranging from 5.605% to 5.939%. The 20-year FXTN was only partially awarded, with an average yield of 6.421%, indicating selective investor appetite for longer durations. Meanwhile, local inflation rose to 1.5% in August, up from 0.9% in July, driven mainly by higher food prices, particularly rice and vegetables, as well as increased transport costs due to fuel price adjustments. Despite the uptick, inflation remained within the Bangko Sentral ng Pilipinas' (BSP) target range of 2–4%, suggesting that price pressures were still manageable. The central bank is forecasting inflation will average 1.7% this year, before rising to 3.3% in 2026 and 3.4% in 2027.

Fund Performance. The Fund continued to track the returns and duration of the iBoxx ABF Philippines. The Fund returned 0.32% for the month, closely tracking the benchmark index.

Fund Strategy. The iBoxx index will see minimal changes for the month. The Fund will rebalance to reflect any changes to continue to closely track the duration of its benchmark.

LIST OF PROSPECTIVE INVESTMENTS

The following are among the Fund's approved investment outlets, wherein the Trustee intends to invest depending on strategy, availability, or other market-driven circumstances:

(a) Index securities consisting of peso-denominated debt obligations issued or guaranteed by the Philippine Government, by an agency or instrumentality of the Philippine Government, by a Philippine Government sponsored entity or quasi Philippine Government entity and peso-denominated debt obligations issued by supranational financial institution, or by an agency or instrumentality of any supranational financial institution or by an entity sponsored by any supranational financial institution, in each case as determined by the Index Licensor and which are for the time being constituent securities of the iBoxx ABF Philippines Index.

(b) Non-index securities consisting of peso-denominated securities which are issued by an issuer of any Index Security and are similar to comparable Index Securities and are likely to behave in such a manner that is consistent with the Investment Objective.

(c) Bank deposits and such other investments allowed under regulations issued by the BSP.
